Step 2: Create a Migration Schema - 2024-05-08 - Comments (0) - Migration

# Lasernet for Dynamics 365

To be able to migrate the configuration from one environment to another we are required to create a schema that tells the migration tool which entities to export and import.

### **Prerequisites**

To be able to execute the steps required in this article the following is required:

• Migration tool for importing and exporting data from and to environments.

#### Steps

1. Open the folder where you previously stored the Data Migration Tool and open the executable.

File Home Share View							-	٥	× ^ 🕐
Pin to Quick Copy Paste Activities Paste Shortcut	Move Copy De	Delete Rename New folder	Gpen - Select Edit Select History Invert	all none selection
