

Access Rights required for AX 2012 Lasetnet Connector

- 2022-12-06 - Comments (0) - AX 2012 FAQs

This article provides information about folder rights and user rights (four Folders that are shared between AX & Lasetnet Server)

Folders: AX and the Lasetnet server

Below is an overview of the rights to the different folders that we use both from AX and the Lasetnet server:

User role	Description
Lasernet administrator	This role provides full access to the Lasetnet Connector including the option to configure reports for Lasetnet and add additional data to the Lasetnet reports. It is possible to select standard and the Lasetnet destinations within the printer dialog. The role also includes providing access to the Lasetnet archive
Lasernet advanced user	This role allows the user to select Lasetnet and standard destinations within the printer dialog but does not provide any further access to the Lasetnet Connector. The user will also have access to the Lasetnet archive. If the reports are not configured for Lasetnet the user will only have access to the standard destinations (SSRS)

User role**Description**

Lasernet user

This role only provides access to the Lasernet destinations within the printer dialog and the Lasernet archive, if the reports are configured for Lasetnet
