

AXupdateinstaller.exe Devinstall Fails on Platform Update 12 - Request for the Permission of Type

- 2023-11-30 - Comments (0) - Lasename FO Connector FAQs

Lasernet for Dynamics 365

When running the **AXupdateinstaller.exe devinstall** on the platform update 12, the following failure error can sometimes occur:

```
C:\Import\AXDeployablePackage_20180201_21_04_48>AXUpdateInstaller.exe devinstall
Request for the permission of type 'System.Security.Permissions.FileIOPermission, mscorlib, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b77a5c561934e889' failed.
   at System.Security.CodeAccessSecurityEngine.Check(Object demand, StackCrawlMark& stackMark, Boolean isPermSet)

   at Microsoft.Dynamics.AX.AXUpdateInstaller.Program.Main(String[] args)
```

Due to Microsoft changing the admin rights on their VM images in a Microsoft subscription, there was a need to change our AOT package starting from Platform Update 12. Developers that are using **AXupdateinstaller.exe devinstall** to install our software will face the above error.

Applying the same package through LCS will work without any problems.

You can also request an AOT package specific to **PU12** from your local Lasename reseller.
