How do I look up Azure Service bus queue or Azure Storage blob container?

Alex Clemons - 2024-01-11 - Comments (0) - Lasernet BC Connector FAQs

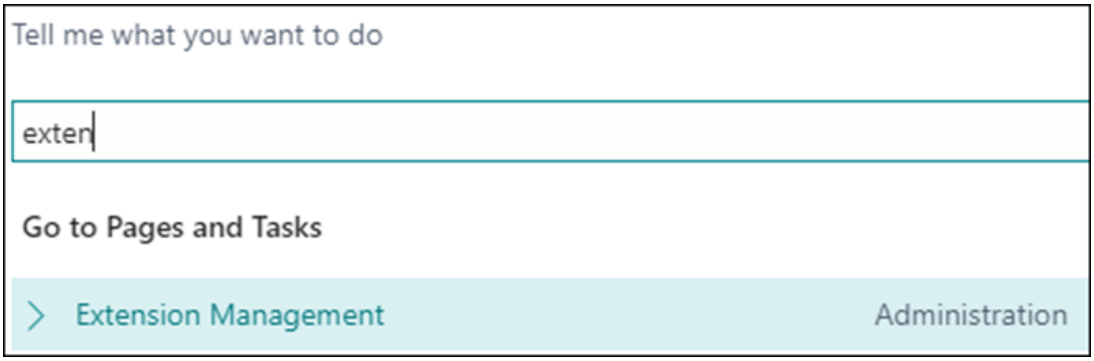
Lasernet for Dynamics 365

This article provides instructions when users cannot look up the Azure Service bus queue or the Azure Storage blob container.

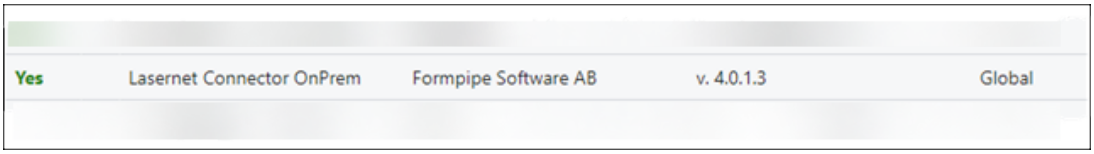
Follow these steps:

1. Select the search icon from the top right-hand corner.

2. Search for ”Extension” and then select **Extension Management**.



3. Locate the **Lasernet Connector** extension.



4. Select the three dots menu and then select **Configure** or in newer version select **View.**

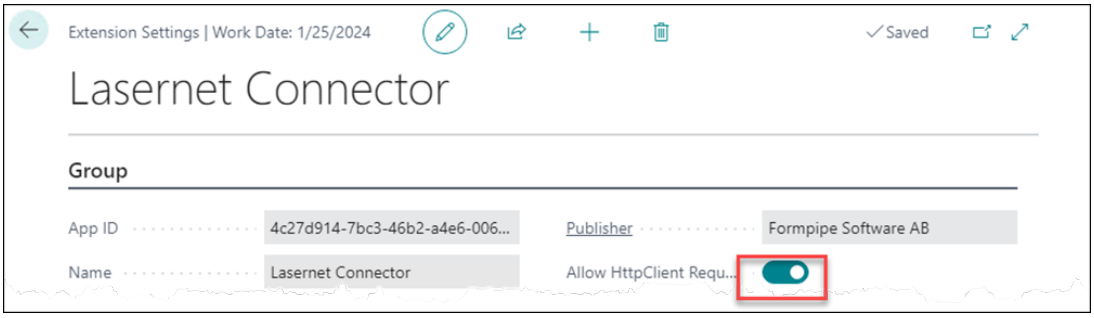
5. Ensure that **Allow HttpClient Request** is enabled.



6. Close the form. You will now be able to look up the queue or blob container.

Note

Before printing a report, ensure that HTTP Requests for System Application are enabled. This is also required to look up a container from the Lasernet Azure Blob Setup page.
