Consolidate tab is not available on the Lasetnet Parameters menu

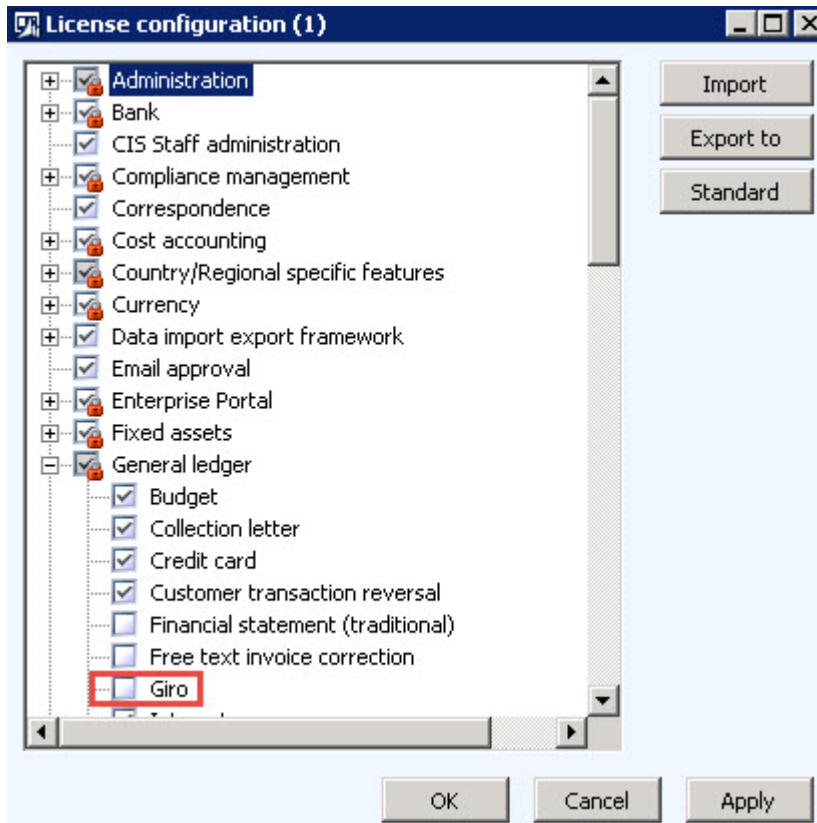

- 2022-10-17 - Comments (0) - AX 2012 FAQs

When trying to access the Consolidate tab within the **Lasetnet > Setup > Parameters**, the tab might appear missing.

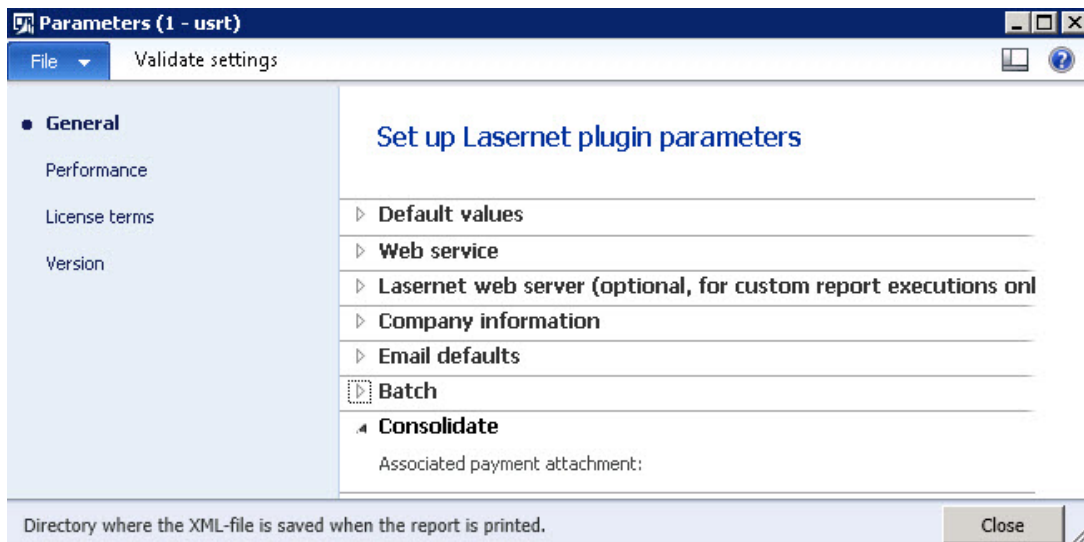

This occurs because Consolidate will only show up if the AX company is defined to use Giro as payment within License Configuration.

Resolution

1. Go into **System administration > Setup > Licensing > License configuration** and then **General ledger**.
2. Select **Giro** and then close the windows. It will then start to synchronize the database.

Consolidate is visible again.

This could happen to any menu within Lasernet, if there is a license key available.
