

## Lasetnet FO Connector Compatibility

Alex Clemons - 2024-11-21 - Comments (0) - Lasetnet FO Connector Compatibility

# Lasetnet for Dynamics 365

The following table displays the compatibility details for Lasetnet Connector for Dynamics 365 Finance and Operations

- The column **Minimum PU Version** lists the minimum update of Dynamics 365 FO that has been released.
- The column **Latest validated PU Version** lists the highest Lasetnet FO Connector update against which compatibility has been validated.

Compatibility with Lasetnet FO Connector is validated each month as part of the PEAP program. Formpipe strives to have this validation completed within three weeks after Microsoft has made a PEAP update available.

The availability described below is the [Microsoft Service Update Availability](#). At the Preview Availability (PEAP) date, we install the MS version and test our LAC version. After three weeks of intensive testing, we will update this article to ensure the validity of the current Lasetnet Connector version. If necessary, we will work on creating a new version to ensure awareness of any compatibility issues before an update from Microsoft becomes available.

### Note

It is possible to receive Microsoft updates three weeks before the available (self-update) release date as long as the customer is a part of the "First release program". We cannot support customers who are part of the "First release program", since we cannot guarantee quality delivery within three weeks from the Preview Availability (PEAP) date. Please see the [First Release Program](#) from Microsoft for further details.

6.2	10.0.0 PU24	10.0.18 PU42
6.1	10.0.0 PU24	10.0.18 PU42

**Note**

Unless otherwise specified, there is no requirement to install a new Lasernetnet FO Connector package when upgrading Dynamics 365 for Finance and Operations.

The Lasernetnet FO Connector packages are forward-compatible. The Lاسernet FO Connector package PU must be less than or equal to the FO PU:

For example, if the FO version is on 10.0.31 (PU55), the FO environment can use the Lاسernet FO Connector package for Update52, Update53, or Update54.

The Lاسernet FO Connector packages are not backward-compatible. The Lاسernet FO Connector package PU cannot be greater than the FO PU:

For example, if the FO version is on 10.0.28 (PU52), the FO environment can only use Update 52. The Lاسernet FO Connector package for Update53 and Update54 will not work on FO 10.0.28 (PU52).
