

## D365 FO Compatibility

Alex Clemons - 2023-05-17 - Comments (0) - D365 FO Connector Compatibility

# Lasernet for Dynamics 365

The following table displays the compatibility details for Lasernet Connector for Finance and Operations

- The column "Minimum PU Version)" lists the minimum update of D365 F&O that has been released.

- The column "Latest validated" lists the highest D365 F&O update against which compatibility has been validated.

Compatibility with D365 F&O is validated each month as part of the PEAP program. Formpipe strives to have this validation completed within three weeks after Microsoft has made a PEAP update available.

The availability described below is the [Microsoft Service Update Availability](#). At the Preview Availability (PEAP) date, we install the MS version and test our LAC version. After three weeks of intensive testing, we will update this article to ensure the validity of the current LAC version. If necessary, we will work on creating a new version to ensure awareness of any compatibility issues before an update from Microsoft becomes available.

### Note

It is possible to receive the Microsoft updates three weeks before the available (self-update) release date as long as the customer is a part of the "First release program". We cannot support customers who are part of the "First release program", since we cannot guarantee quality delivery within three weeks from the Preview Availability (PEAP) date. Please see the [First Release Program](#) from Microsoft for further details.

### Note

\*Use of **SharePoint with the Lasernet Connector** for Microsoft version 10.0.32 PU 56 and higher will require an upgrade of the Lasernet Connector version. For more details, please see the following [article](#).

| <b>Formpipe LAC Connector Version</b> | <b>Minimum PU Version (D365FO)</b> | <b>Latest validated PU Version (D365FO)</b>                       |
|---------------------------------------|------------------------------------|---|

| 6.14                                  | 10.0.10<br>PU 34                   | 10.0.33*<br>PU57 (Build 10.0.1549)                                |
| 6.13                                  | 10.0.10<br>PU 34                   | 10.0.18<br>PU 42  |
| 6.12                                  | 10.0.10<br>PU 34                   | 10.0.18<br>PU 42  |
| 6.11                                  | 10.0.10<br>PU 34                   | 10.0.18<br>PU 42  |
| 6.10                                  | 10.0.10<br>PU 34                   | 10.0.18<br>PU 42  |
| 6.9                                   | 10.0.0<br>PU 24                    | 10.0.18<br>PU 42  |

|     |                 |                  |
|-----|-----------------|------------------|
| 6.8 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.7 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.6 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.5 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.4 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.3 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.2 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |
| 6.1 | 10.0.0<br>PU 24 | 10.0.18<br>PU 42 |

#### Note

Unless otherwise specified, there is no requirement to install a new Lasernet Connector package when upgrading Dynamics 365 for Finance and Operations.

The LAC packages are forward-compatible. The LAC package PU must be less than or equal to the FO PU:

For example, if the FO version is on 10.0.31 (PU55), the FO environment can use the LAC package for Update52, Update53, or Update54.

The LAC packages are not backward-compatible. The LAC package PU cannot be greater than the FO PU:

For example, if the FO version is on 10.0.28 (PU52), the FO environment can only use Update 52. The LAC package for Update53 and Update54 will not work on FO 10.0.28 (PU52).
