

Error: "Assembly containing type Lasetnet.WebService7.LnWebServiceSoapClient is not referenced."

- 2022-10-21 - Comments (0) - AX 2012 FAQs

This article provides a solution for the following error message:

"Assembly containing type Lasetnet.WebService7.LnWebServiceSoapClient is not referenced."

This occurs if you try to retrieve printers or printer profiles etc. in AX from the Lasetnet server. The problem is related to a mismatch between the Lasetnet C# project and the Lasetnet Webservice, normally because of upgrading the Lasetnet server from version 6.6.x to 6.7.x or newer.

The screenshot shows an 'Infolog (1)' window with a red 'X' icon and the text: 'One or more critical STOP errors have occurred. Use the error messages below to guide you or'. Below this is a 'Message (10:49:34)' box containing two entries: 'Assembly containing type LaserNet.WebService7.LnWebServiceSoapClient is not referenced.' and 'Error', each with a red 'X' icon.

Resolution

This can be resolved by manually adding the printers or printer profiles. This is fixed from LAC2012 version 3.3.x.x.
