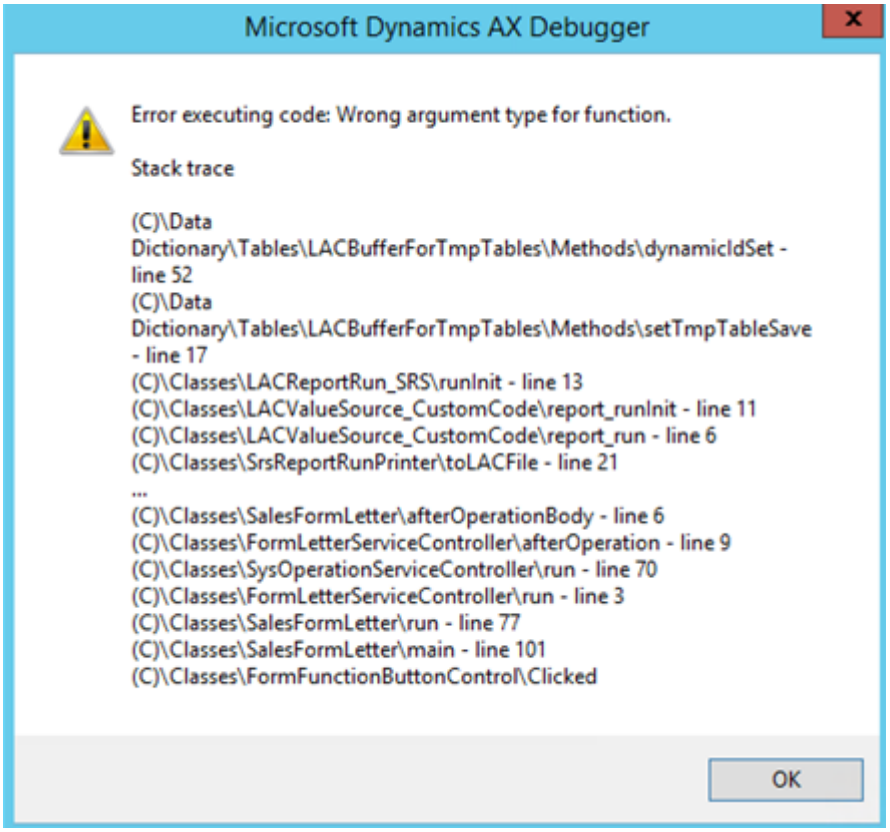
# Error executing code: "Wrong argument type for function."

- 2022-10-21 - Comments (0) - AX 2012 FAQs

This article provides a solution for "*Error executing code:  Wrong argument type for function*", after upgrading the Lasernet Connector.



**Resolution**

1. Within AX, select **Lasernet**.

2. Select **Reports**.

3. Mark all **SSRS reports**. No Lasernet query reports should be selected.

4. In the top menu, select **Stylesheet** and then **Refresh**.
