# Lasernet for Dynamics 365

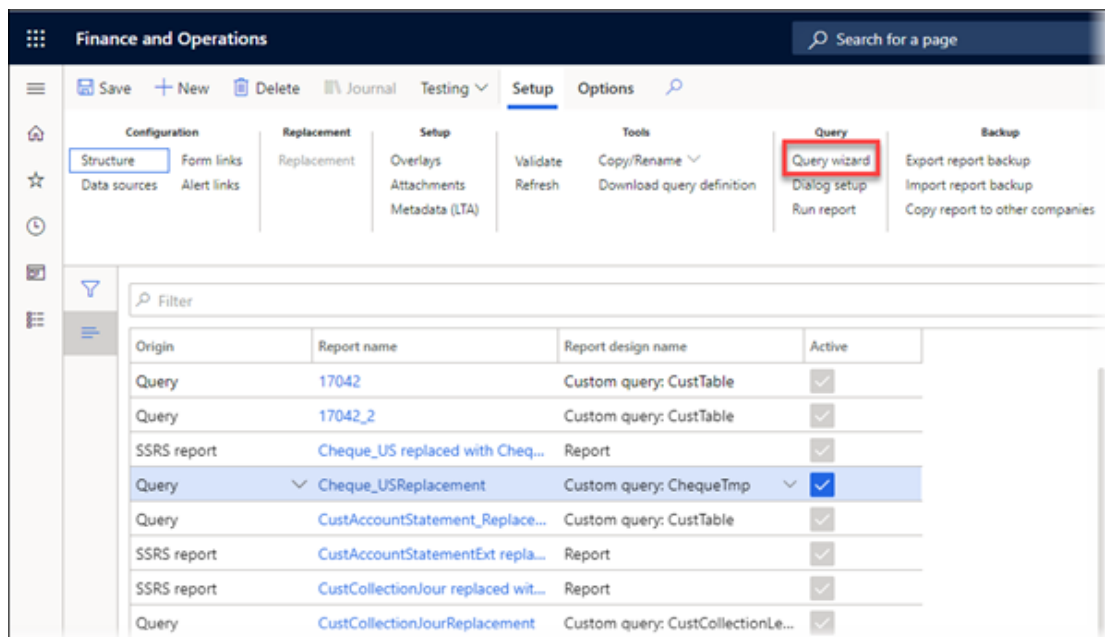

The purpose of this article is to provide a solution to the following error message you may receive when trying to run a Lasernet report in D365:

*'Argument to method isFieldDataRetrieved out of range.'*

This error can happen after importing a report with at least one field the environment does not have

To resolve this issue, follow these steps:

1. Open the **Query wizard** for the query report.

2. Select **Next** until the very end and then click **Finish**.

Walking through the Query wizard from start to finish will refresh the report and can remove fields or methods that can be causing this error.
