Lasernet for Dynamics 365

The purpose of this article is to provide a solution for the following error you may encounter in Dynamics 365 when setting up Lasetnet Cloud printing:

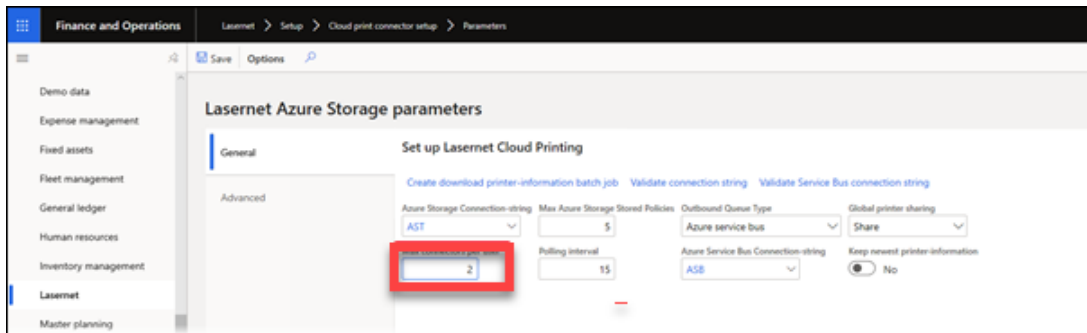

Error

Currently, max # connectors allowed per user. Please remove 1 connectors and try again.

 Currently, max 2 connectors allowed per user. Please remove 1 connectors and try again.

This error happens when the same user downloads the maximum number of Lasetnet print connector-configurations set in **Lasetnet > Setup > Cloud print connector > Parameters**.

To fix this, the Max connectors per user field can be increased. Please keep in mind that increasing the configuration in AX will result in multiple queues and blobs and Azure service Bus queues have a default value of 10,000 for a maximum number of queues.

The screenshot shows the 'Lasernet Azure Storage parameters' setup screen in Dynamics 365. The 'Max Azure Storage Stored Policies' field is highlighted with a red box and contains the value '2'. The screen also displays other configuration options like 'Azure Storage Connection-string', 'Outbound Queue Type', and 'Global printer sharing'.

Alternatively, the user can delete one of their configurations in **Lasetnet > Setup > Cloud print connector setup > User setup**.
