Lasernet for Dynamics 365

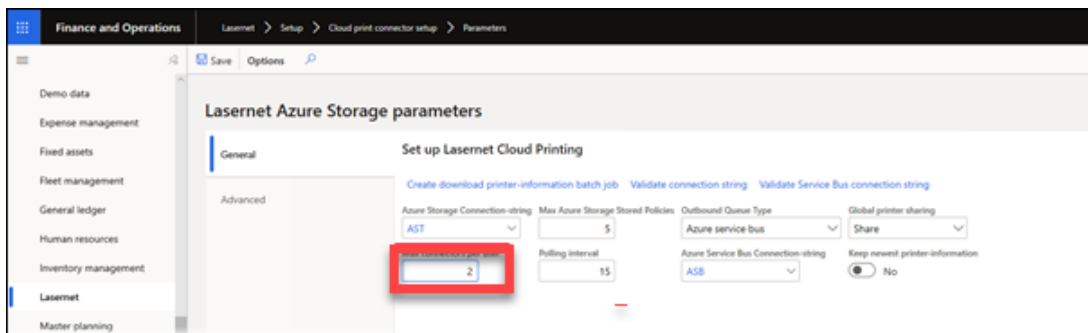

The purpose of this article is to provide a solution for the following error you may encounter in D365 when setting up Lasernet Cloud printing:

'Currently, max # connectors allowed per user. Please remove 1 connectors and try again.'

 Currently, max 2 connectors allowed per user. Please remove 1 connectors and try again.

This error happens when the same user downloads the maximum number of Lasetnet print connector-configurations set in Lasetnet > Setup > Cloud print connector > Parameters.

To fix this, the Max connectors per user field can be increased. Please keep in mind that increasing the configuration in AX will result in multiple queues and blobs and Azure service Bus queues have a default value of 10,000 for a maximum number of queues.

Alternatively, the user can delete one of their configurations in **Lasernet > Setup > Cloud print connector setup > User setup**.

Finance and Operations | Lasernet > Setup > Cloud print connector setup > User setup

Edit + New Delete Delete locally Open Lasetnet Cloud Print Connector-configuration Download Lasetnet Cloud Print Connector-configuration Revoke Reinstate
