

Error Message: "Duplicate name found in report Textbox_x, Textbox_x property"

- 2024-02-05 - Comments (0) - AX 2012 FAQs

This article provides a solution for the following error message which may appear in AX 2012:

*"Duplicate name found in report Textbox_x, Textbox_x property
<DataElementName=xxxx>"*

Resolution

If you are using the Lasernet SSRS of this report when you receive this error, follow these steps:

1. Navigate to **Lasernet > Reports > select your report > Elements**.
2. Select **Fix report** and follow the wizard.

If you receive this error when attempting to import a Lascript SSRS report and its replacement query, follow these steps:

1. Create the SSRS report in **Lasernet > Reports** and import only the replacement.
2. Replace the SSRS report with the query.

Additional information

The issue is caused by the AX SSRS report, that has duplicated fields. Lascript **Fix report** will take care of duplicated fields. More information on the Fix report function can be found in the [Lasernet FO Connector - Fix Reports](#) guide.
