Error message during Compiling: "System.Web.MimeMappings is not a class."

- 2022-10-14 - Comments (0) - AX 2012 FAQs

This article describes a solution for the following compilation error that can appear in AX 2012:

System.Web.MimeMapping is not a class.

The screenshot shows the 'Compiler output' window in Visual Studio. At the top, there are summary statistics: 1 Error, 1 Warning, 0 Best practices, and 18 Tasks. Below this is a table with the following data:

| Description | Path | Line | Method/Property name | Diagnostic ID |
|--|---|------|----------------------|---------------|
| System.Web.MimeMapping is not a class. | \Classes\LACAttachmentFile\getContentType | 3 | getContentType | Err:76 |

Resolution

Lasernet needs at least .net version 4.5 in order to use the Attachment and loading of AOS / Client printers functions.

Please install .net version 4.5 or newer and then compile again.

Additional information on system requirements can be found in the *Lasernet Connector for Microsoft Dynamics AX 2012 - Installation Manual*.
