Error Message: 'Error during AOS update: Unable to resolve dependency 'dynamicsax-lasernet'.'

- 2023-11-30 - Comments (0) - Lasernet FO Connector FAQs

Lasernet for Dynamics 365

When deploying a software deployable package, the following error message may be displayed:

```
[2020-09-14 13:58:00Z] Error during AOS update: Unable to resolve dependency 'dynamicsax-lasernet'.
[2020-09-14 13:58:00Z]
```

The error occurs because not all models that have dependency are included in the deployable package. The solution is to include all models.

Check your model dependency
To check your model dependency, follow these steps:

1. Open **Visual Studio** > **View** > **Explorer** > **Model view**.

2. Right-click model and select **View package dependencies** > **View incoming references**.
