

Error Message: 'Settings must be of form "name=value"'

Claire Oakey - 2023-10-30 - Comments (0) - Lasetnet FO Connector FAQs

Lasernet for Dynamics 365

The following error message may appear when setting up a Finance and Operations On-prem environment with file system type connections:

Error

Settings must be of form "name=value".

This error is caused by having the **Demo only! Use open azure storage links for images and attachments** option enabled in **Lasernet > Setup > Parameters**.

This issue occurs because the demo mode will try to use an Azure connection to communicate with Lasernet by providing the Account key and Azure Account Name in the JobInfos section of the XML. However, On-prem solutions do not use Azure-type connections.

Solution

To resolve this error, navigate to **Lasernet > Setup > Parameters** and disable the **Demo only! Use open azure storage links for images and attachments** option.
