

Error Message: 'Updating XML Processing Custom fields Lasename report #ReportName# Access Denied'

- 2023-11-30 - Comments (0) - Lasename FO Connector FAQs

Lasename for Dynamics 365

The Lasename Connector for Microsoft Dynamics for Operation and Finance works exactly like standard AX in terms of user permissions to tables and fields. That means that if you use a Replacement report, a Query report, a Subreport (also a Query report) or adding extra data within Elements (Structure in newer versions), users will need permissions to access those tables or fields.

It is, therefore, important to ensure that, when you create a new user role or use one of the existing roles in AX, users have access to the required tables and fields.

Otherwise, you might experience an error message similar to this:

The screenshot shows a software interface with a light blue header bar containing the text "Click the edit button to make changes." Below this is a red error message bar with a red 'X' icon and the text: "Lasename report LeaseAgreement Updating XML Processing Custom fields Lasename report CompanyInfo Access denied to field Bank account number (AccountNum) in table Bank accounts (BankAccountTable)." Below the error message is a grey bar with the text "CONTRACTS" in blue and "SC750500000018 : 3.0 - Use agreement" in black.
