

## How do I upgrade Lاسernet within the same version?

Kacper Dylewski - 2024-07-24 - Comments (0) - Lاسernet FAQs

Follow the instructions in this article to upgrade within the same major version of Lاسernet, for example, from Lاسernet 9.13 to Lاسernet 9.15.

For upgrades within the same version, it is essential to have local Administrator privileges and run the installer on the same machine. There is no need to stop services or de-activate licenses.

### Note

For more information, see [Upgrading from Lاسernet Version 9 to 10](#).

### Additional Precautions

It is recommended that you create a backup of your current configuration. If a problem arises, recovery is possible by importing the entire configuration into the Lاسernet Developer.
