How to find space (0x20) in an element name?

- 2021-11-03 - Comments (0) - AX 2012 FAQs

This article provides details in finding an element with a space (0x20) in the name via searching in the table.

Resolution

Please follow these steps:

1. Open the AOT (press **CTRL + D**).
2. Expand **Data Dictionary** and then **Tables**.
3. Select the first table and then start typing "lacreportelement" on your keyboard.
4. Right-click **LACReportElement** and choose **Add-Ins** and the **Table browser**.
5. Press **CTRL + G** and then locate the column with the report name and type the "reportname*".
6. In the ElementName column, type "* *".

Cond...	DataType	DisplayValue	Eleb...	ElementName	ElementOutput	FullPath	L	L	L	L	NodeType	N	Number...	ReportName	Seq...	ValueCode
None	String	Calculated Company(s)	0	* *	FP_Element with a space	Report\pageFooter\LAC_Cu...					None		0	SalesConfirm*	0	LACValueSource_Co

Now you know the name of the element so you can search for it within the reports elements.
