

## How to find space (0x20) in an element name?

- 2021-11-03 - Comments (0) - AX2012

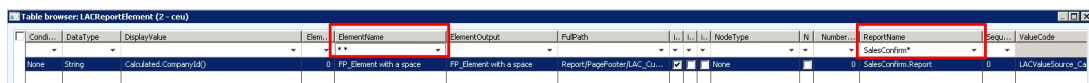

This article provides details in finding an element with a space (0x20) in the name via searching in the table.

### Resolution

Please follow these steps:

1. Open the AOT (press **CTRL + D**).
2. Expand **Data Dictionary** and then **Tables**.
3. Select the first table and then start typing "lacreportelement" on your keyboard.
4. Right-click **LACReportElement** and choose **Add-Ins** and the **Table browser**.
5. Press **CTRL + G** and then locate the column with the report name and type the "reportname\*".
6. In the ElementName column, type "\* \*".

Cond...	Data Type	Display Value	Elem...	ElementName	ElementOutput	FullPath	...	Node Type	N	Number...	ReportName	Seq...	Value Code
None	String	Calculated Company(LD)	0	FP_Element with a space	FP_Element with a space	Report\PageFooter\LAC_Cu...		None		0	SalesConfirmReport	0	LACValueSource_Cs

Now you know the name of the element so you can search for it within the reports elements.
