How to find space (0x20) in an element name?

- 2021-11-03 - Comments (0) - AX 2012 FAQs

This article provides details in finding an element with a space (0x20) in the name via searching in the table.

Resolution

Please follow these steps:

1. Open the AOT (press **CTRL + D**).
2. Expand **Data Dictionary** and then **Tables**.
3. Select the first table and then start typing "lacreportelement" on your keyboard.
4. Right-click **LACReportElement** and choose **Add-Ins** and the **Table browser**.
5. Press **CTRL + G** and then locate the column with the report name and type the "reportname*".
6. In the ElementName column, type "* *".

Condition	DataType	DisplayValue	ElementName	ElementOutput	FullPath	NodeType	NumberType	ReportName	Sequence	ValueCode
None	String	Calculated.CompanyId	0 FP_Element with a space	FP_Element with a space	Report PageFooter LAC_Cus...	None	None	0 SalesConfirm.Report	0	LACValueSource_Ca...

Now you know the name of the element so you can search for it within the reports elements.
