Lasernet FO Connector is not affected by end of support for SHA1 Licenses

Alice Petruzzella - 2024-07-09 - Comments (0) - D365 FO Connector General Information

Microsoft has recently informed that support for independent software vendor (ISV) licenses, generated using the SHA1 algorithm, will be discontinued starting with Dynamics 365 Finance and Operations version 10.0.39/PU63.

You can find more information about this by following this link.

However, the license for the Lasernet Connector for Dynamics 365 Finance and Operations does not use the SH1 algorithm. Therefore, it will not be affected by this change.
