

Lasetnet - License Plate Label Setup Fast Tab on the Mobile Device Menu Items Form

- 2023-11-30 - Comments (0) - Lasetnet FO Connector FAQs

The appearance of the fast tab '**Lasetnet - License plate label setup**' is based upon the 'Work creation process' and 'Work order type'. For this fast tab to appear/disappear, the following article will discuss the needed criteria.

Mode fields

The Mode field on the *Mobile device menu items* form can either be set to '**Indirect**' or '**Work**'.

Mode = Indirect

- When Mode is set to **Indirect** the **Activity code** field decides if the fast tab should appear or not.
- If the Activity code is set to **Reprint label**, only then the fast tab appears.
- For the selection of all other values within the Activity code field, the fast tab will not appear.

Examples:

When the Activity code is set to 'Reprint label':

Warehouse management > Setup > Mobile device > Mobile device menu items

Default data Work confirmation setup Cycle counting System-directed sorting orders Edit query Field list Options

Mobile device menu items | Standard view

Menu item name Title Mode Use existing work
 Reprint Label Reprint Label Indirect No

General

Activity code Use process guide
 Reprint label Yes

Lasernet - License plate label setup

+ New Delete

Warehouse	User ID	Show reference	Show note	Show print qua...	Show print to
		✓	✓	✓	✓

When the Activity code is set to a value *other than* Reprint label (i.e. Change warehouse):

Warehouse management > Setup > Mobile device > Mobile device menu items

Default data Work confirmation setup Cycle counting System-directed sorting orders Edit query Field list Options

Mobile device menu items | Standard view

Menu item name Title Mode Use existing work
 Change Warehouse Change Warehouse Indirect No

General

Activity code Use process guide
 Change warehouse Yes

The 'Lasernet - License plate label setup' fast tab is not shown

Mode = Work

In this case, the Lasernet fast tab will only appear for all the Work Creation Processes that come under the following Work Order Types:

- Purchase Order
- Transfer Order
- Production

For Work Creation Processes that come under all other Work Order types, the fast tab will **not** appear. These Work Order Types include:

- Return Order
- Inventory

- Cycle count

For a complete list of Work order types and their work creation processes, refer to this article:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/warehousing/configure-mobile-devices-warehouse#configure-menu-items-to-create-work-for-another-worker-or-process>

Examples:

When the Work Order Type is either Purchase Order or Transfer Order or Production:

Work Order Type: **Production**

Work Creation Process: **Kanban**

The screenshot shows the 'Mobile device menu items' setup page in Dynamics 365 Finance and Operations. The left sidebar lists various mobile device menu items, with 'Kanban receipt' selected. The main area shows the configuration for 'Kanban receipt'. The 'Mode' dropdown is set to 'Work'. The 'Work creation process' dropdown is set to 'Kanban'. The 'Generate license plate' and 'Print label' options are both set to 'No'. The 'Use process guide' option is also set to 'No'. The 'Work template' dropdown is empty. The 'Override batch number' and 'Display container type' options are both set to 'No'. A red box highlights the 'Mode' dropdown, and another red box highlights the 'Work creation process' dropdown. A third red box highlights the 'Lasernet - License plate label setup' section.

When the work order type is either Return Order or Inventory or Cycle Count:

Work order type: **Inventory**

Work creation process: **Movement**

The screenshot shows the 'Mobile device menu items' setup page in Dynamics 365 Finance and Operations. The left sidebar lists various mobile device menu items, with 'Movement' selected. The main area shows the configuration for 'Movement'. The 'Mode' dropdown is set to 'Work'. The 'Work creation process' dropdown is set to 'Movement'. The 'Generate license plate' and 'Display container type' options are both set to 'No'. The 'Display inventory status' option is also set to 'No'. The 'Use default data' and 'Use process guide' options are both set to 'No'. The 'Confirm cancel' option is also set to 'No'. A red box highlights the 'Mode' dropdown, and another red box highlights the 'Work creation process' dropdown.
