

Lasetnet - License Plate Label Setup Fast Tab on the Mobile Device Menu Items Form

- 2023-11-30 - Comments (0) - Lasetnet FO Connector FAQs

The appearance of the fast tab '**Lasetnet - License plate label setup**' is based upon the 'Work creation process' and 'Work order type'. For this fast tab to appear/disappear, the following article will discuss the needed criteria.

Mode fields

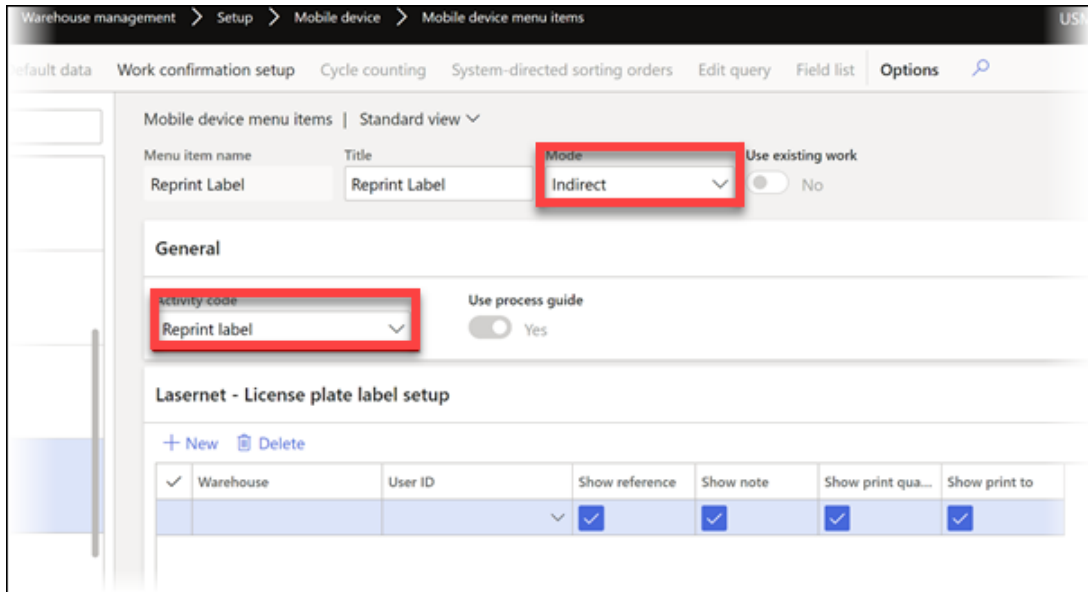

The Mode field on the *Mobile device menu items* form can either be set to '**Indirect**' or '**Work**'.

Mode = Indirect

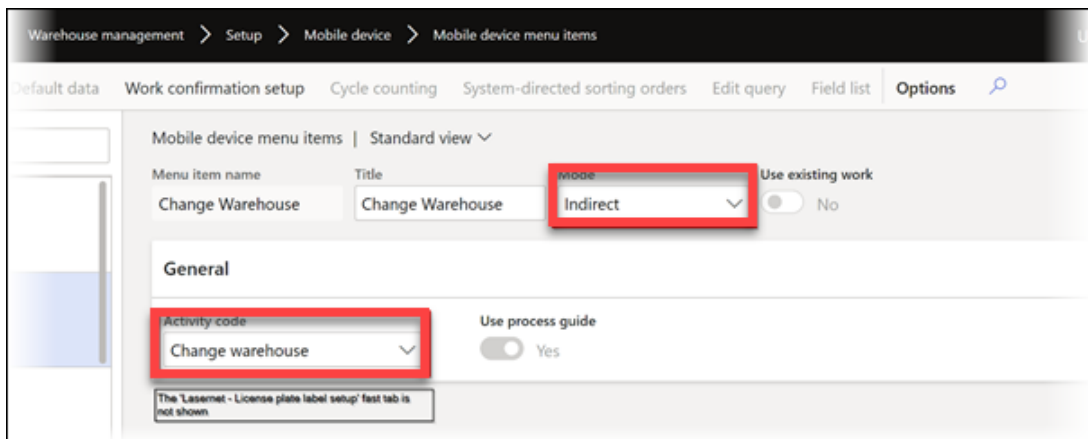

- When Mode is set to **Indirect** the **Activity code** field decides if the fast tab should appear or not.
- If the Activity code is set to **Reprint label**, only then the fast tab appears.
- For the selection of all other values within the Activity code field, the fast tab will not appear.

Examples:

When the Activity code is set to 'Reprint label':

When the Activity code is set to a value *other than* Reprint label (i.e. Change warehouse):

Mode = Work

In this case, the Lasernet fast tab will only appear for all the Work Creation Processes that come under the following Work Order Types:

- Purchase Order
- Transfer Order
- Production

For Work Creation Processes that come under all other Work Order types, the fast tab will **not** appear. These Work Order Types include:

- Return Order
- Inventory

- Cycle count

For a complete list of Work order types and their work creation processes, refer to this article:

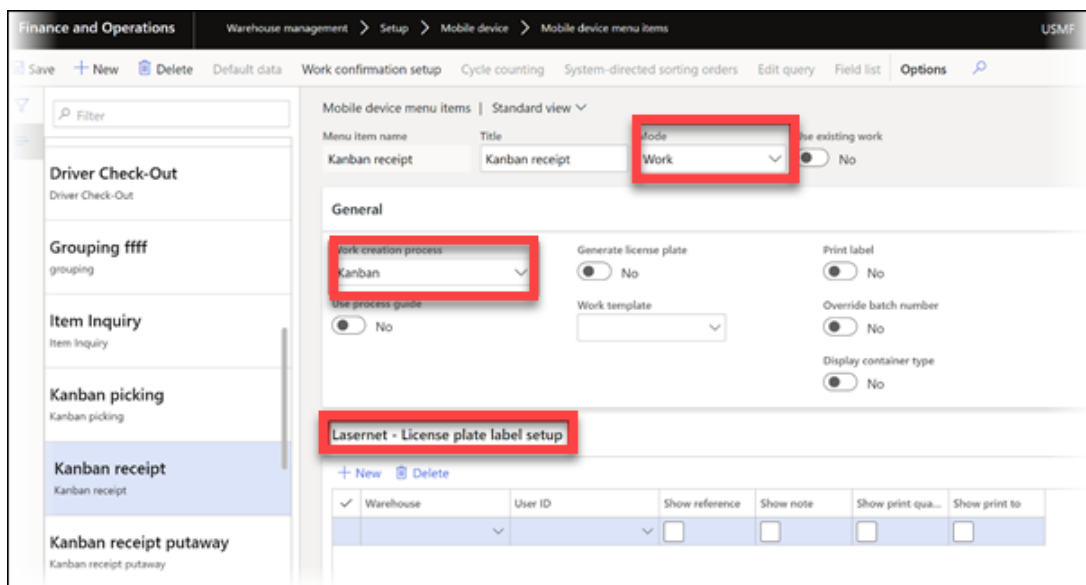

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/warehousing/configure-mobile-devices-warehouse#configure-menu-items-to-create-work-for-another-worker-or-process>

Examples:

When the Work Order Type is either Purchase Order or Transfer Order or Production:

Work Order Type: **Production**

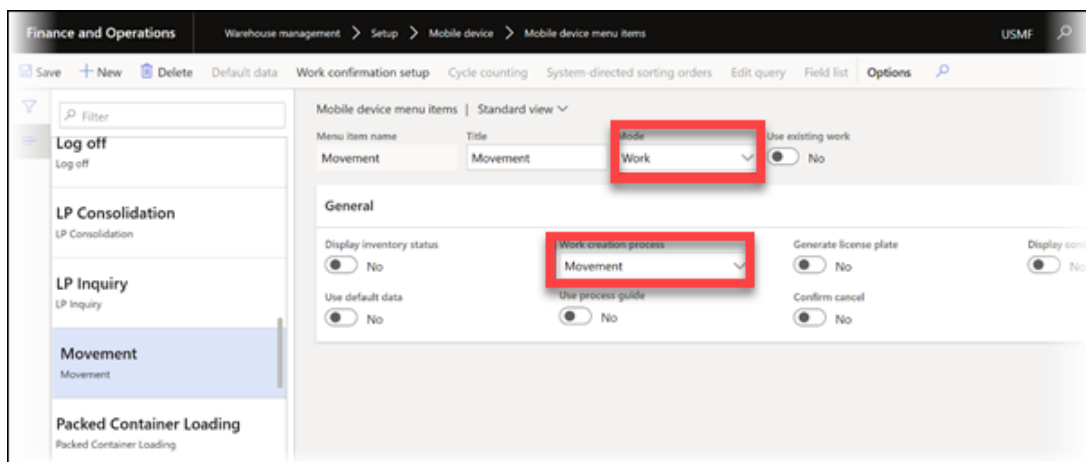

Work Creation Process: **Kanban**

When the work order type is either Return Order or Inventory or Cycle Count:

Work order type: **Inventory**

Work creation process: **Movement**
