

## PDF Pending

Kate Coles - 2022-03-23 - Comments (0) - AX 2012 FAQs

This article provides a solution for "PDF Pending" error message in the Lasernet archive.

Lasernet Log (1 - usmf) - Report name: SalesConfirm.Report, Archive name: Confirmation\_055514\_20200428\_000758-53

File | Preview | Resend

Overview | PDF pending... | Show XML

Report name	Archive name	Destination	Order ID
SalesConfirm.Report	Confirmation_055514_20200428_000758-53	Print Manual: Zebra 140XiIII Plus	000758

**General**

<b>System</b>		<b>Reference</b>	
Archive name:	Confirmation_055514_20200428_000758-53	Account number:	US-001
Report name:	SalesConfirm.Report	Document ID:	CCF-000129

Save in:	File folder		
Format:			

This is normally related to the AX batch. The Lascript Tasks batch job moves files from the PDF Preview folder to the PDF Archive folder. "PDF Pending" indicates that the file is not available in the PDF archive folder.

### Resolution

Please carry out the following steps to resolve this issue.

- Check the log on the Lascript Tasks batch job in **System administration > Inquiries > Batch jobs for errors**.

Batch job (1) - Job description: Lasernet tasks, Waiting, Partition Key: initialJob description: Lasetnet tasks

File View tasks Batch job history Recurrence Alerts Functions Log Generated files

Overview General

Status	Job description	Scheduled start date/time	Actual start date/time
Waiting	Lasetnet tasks	01-06-2020 22:16:45	

- Ensure that the AOS service account and Lasetnet service account have proper rights to the four folders in **Lasetnet > Setup > Parameters**.

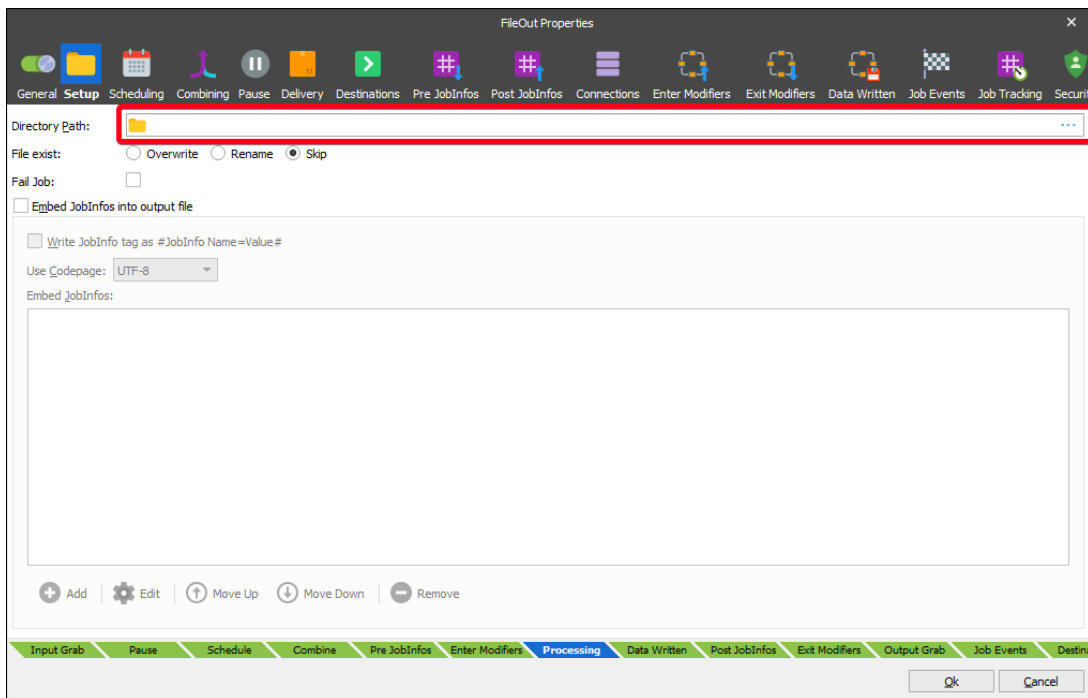

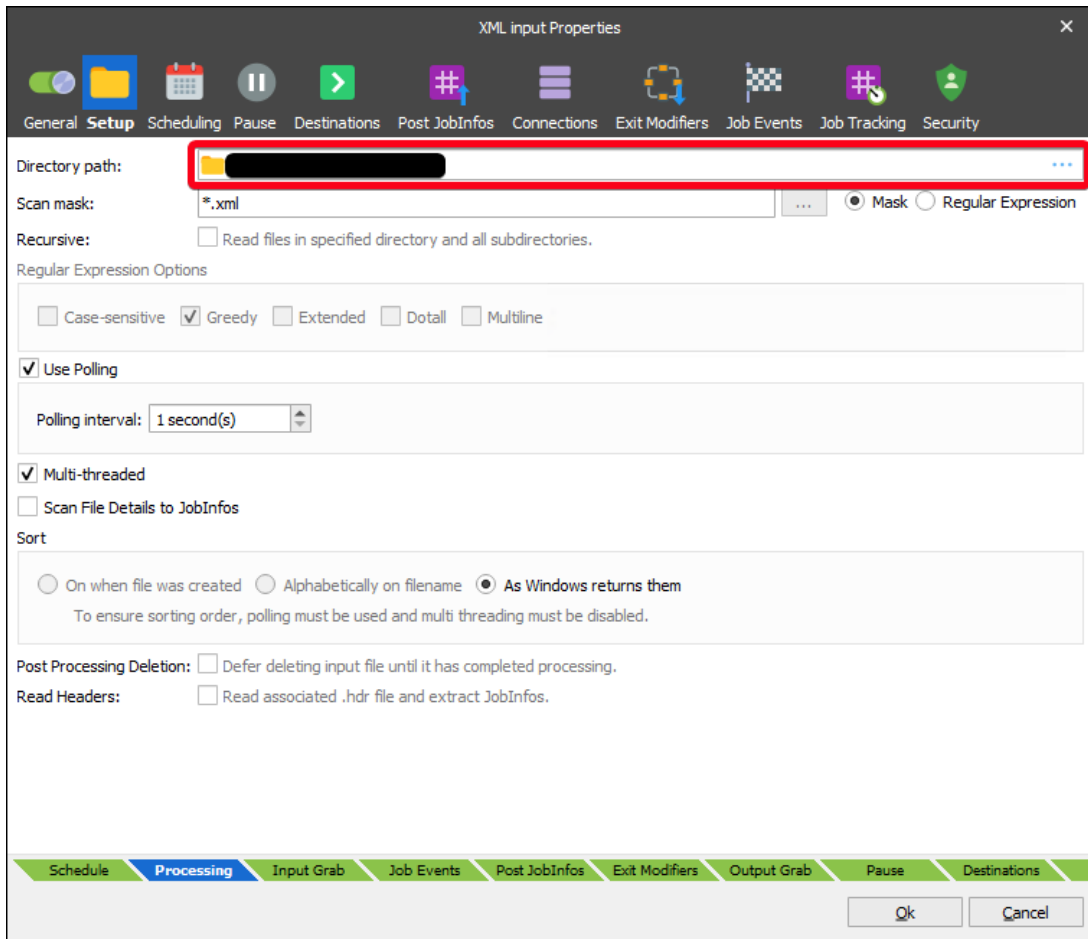

More details on the needed rights can be found in our [Access Rights required for AX 2012 Lasetnet Connector](#) solutions article.

- Check if the Lasetnet parameter -> **Batch group** exists and that the group has selected a Batch server.

**Batch**

Batch group:

- Check that the Lasetnet Developer configuration's File input module and File Output module have Directory paths set correctly.

### Additional information

It is very important that the selected batch group in the Lasernet parameter exists and that the batch job runs fine, otherwise, Lascript won't be able to archive anything. Lascript print to screen will work just fine.
