

Printer Input Port settings when upgrading from Lاسernet 9 to Lاسernet 10

Adam McStravick - 2023-06-14 - Comments (0) - Lاسernet General Information

Lاسernet

This article applies to users upgrading from Lاسernet 9 to Lاسernet 10, both on the same server and with an ERP system sending data to Lاسernet via Print Input modules.

Lاسernet 10 has increased security, with some Lاسernet Printer Port settings effected. Therefore, manual steps are necessary to ensure 100% compatibility.

We recommend that you follow the steps in this article to ensure Lاسernet Input printers process jobs into Lاسernet 10 as expected.

Additional steps

Follow these steps after upgrading:

1. Use the Print Manager tool to edit properties on windows printer and temporarily set the port to FILE: you can then deselect the Lاسernet Printer Port 9.
2. Use the Print Manager tool to browse to ports and delete the old Lاسernet Printer Port 9.
3. Open Lاسernet Developer 10 and deploy the configuration.
4. Refresh Ports on Print Manager to check a new port has been created of the type Lاسernet Printer Port 10.
5. Edit properties in Windows Input printer; change the port to use the new Lاسernet Printer Port 10.
