

Start Lاسernet automatically as Administrator.

- 2021-05-04 - Comments (0) - Lاسernet Developer FAQs

Lاسernet

On occasion, there is a requirement to start Lاسernet Developer as Administrator to have the rights to save changes. To do this, follow these steps:

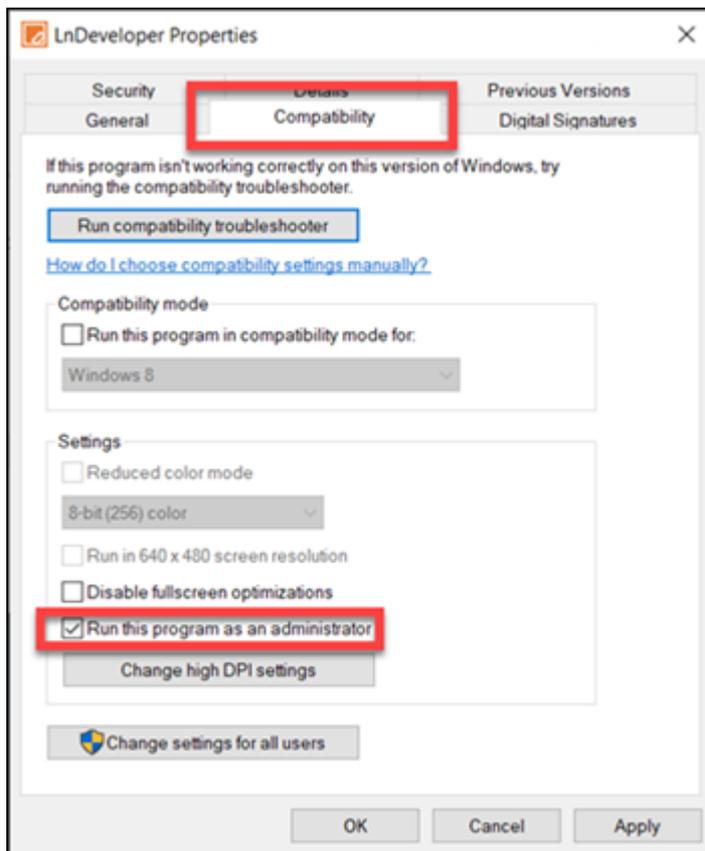

1. Right-click the Lاسernet Developer short-cut icon and select **Properties**.

2. Click the **Shortcut** tab and then select **Advanced**.
3. Select the **run as administrator** checkbox, click **OK** and then **OK** again.

The above is for the Shortcut. To set it directly on the Lاسernet Developer.exe file itself, follow these steps:

1. Find the file in C:\Program Files\Formpipe Software\Lاسernet 9.
2. Right-click the **LnDeveloper.exe** file and select **Properties**.
3. Click the **Compatibilities** tab and select the **Run this program as an administrator** checkbox.

4. Click **OK**.
