# Lasernet

You can use top and bottom margins of the table to manage the table style. It could be useful if you need additional space between header/footer and the Conditional Area in a particular form.

In this exercise, we will add additional space for transfer from/to labels/sums on the top and the bottom of the Conditional Area.

### Exercise

Download and import the attached configuration called **21. Tables (Margins)** in **Lasernet Developer 9**. Afterwards, go to the **Forms** section and open the **Sample** form.

1. Select a rearrange in the **Amount** column on the **First Page** tab.
2. On the Developer toolbar, click **Calculation**, and then click **Subtotal CurrentPage**.

A subtotal has been added relative to the bottom of the Conditional Area.

You can now insert a margin in the body of the table to include the subtotal in the table.

3. Open the **Table Properties** dialog and switch to the **Body** tab. Make sure that the **First** radio button is selected in the **Current Page** group box.

4. Set **Bottom Margin** to **5 mm**.

5. In the **Current Page** group box, select the **Middle** radio button.

6. Set **Bottom Margin** to **5 mm**.

7. Click **Ok** to confirm changes.

8. In the output, switch to the **First Page** tab and use the **Text** tool to insert the **Transfer to next page** text at the bottom of the page.

9. Edit the text properties. To this end, open the **Edit Rearrange** dialog and switch to the **Position** tab. Set **Relative to** to **Bottom of cond. area (Absolute)**.

10. Set the **Y** position to **4 mm** and the **Font** style to **Bold**.

The screenshot shows the Lasetnet Form Editor 9 interface. The 'Edit Rearrange' dialog is open, displaying the 'Position' tab. The 'Relative to' dropdown is set to 'Bottom of cond. area (Absolute)'. The 'Y' position is set to '4.0 mm'. The 'Font' style is set to 'Bold'. A red circle with the number '9' highlights the 'Relative to' dropdown, and another red circle with the number '10' highlights the 'Y' position field. The background shows a form design with a table and a 'Transfer to next page' text element at the bottom.

11. Select the added objects, right-click the selection, and then select **First** and **Middle** for **Absolute**.
