

## Unable to Run Report from Lasetnet Reports Form

Alex Clemons - 2023-12-01 - Comments (0) - Lasetnet FO Connector FAQs

# Lasernet for Dynamics 365

The Run Report function in the Lasetnet connector exists on the Lasetnet Reports form and allows you to run a query report directly from the reports list.

You may receive errors when trying to use Run Report that result in no report generation. Some examples of errors you might encounter are:

### Error

Something went wrong while generating the report. Please try again.

### Error

Error executing code: The field with ID '0' does not exist in table '[Table name]'.

## Error

Function [Function name] has been incorrectly called.

## Solution

This error can occur with replacement queries with a Resend menu item as the report cannot be properly initialized from the Lasernet reports form. Print the report from the corresponding form within Dynamics 365 FO by triggering the form link associated with it.

**Example:** Print the SalesInvoiceReplacement report from the Invoice Journal form in the Accounts Receivable module.

The screenshot shows the Dynamics 365 Finance and Operations interface. The main window is titled "Invoice Journal" and displays a table of invoice data. A context menu is open over the table, showing options: "Lasernet Copy preview", "Lasernet Original preview", "Resend", and "Archive".

Invoice	Invoice account	Name	Sales order	Date	Voucher	Currency	Invoice amount	Intercompany c...	Intercompany ...	Posted via inter...	Line-spe
