

When I try to save a form in Lاسernet the message 'Unable to create file' is displayed?

Nicole Ojeda - 2022-08-26 - Comments (0) - Lاسernet FAQs

Lاسernet

Depending on where your Lاسernet build is located, Lاسernet Developer may need to be run with elevated permissions. For example, elevated permissions are required to save data to the *Program Files* directory. If you require elevated permissions to save your Lاسernet build, the message 'Unable to create file' is displayed.

To run the Lاسernet Developer or Lاسernet Monitor with elevated permissions, right-hand click the application's icon and select **Run as administrator**.
