- Click to download the [Autoform DM 10.3 Installer](#)

- We strongly recommend that you check [Upgrading Notable Versions](#) for any important notes about upgrading to this version

New Features

The following new features are included with this release:

- PDM-8375 – Auditing Frontend

- PDM-11550 – Document Import (CUK Matching)

- PDM-6813 – Document Retention Policy

Removal of docName from the Document Model

The docName column has been removed from the document model. This column was a rarely-used feature for integrating with Autoform DM Client apps.
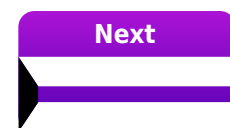

The value of docName almost always matched the name of the document definition. As a result, any integrations that use the docName column for this purpose should be updated to use the document definition column instead.

Miscellaneous Improvements

- New version specific context-sensitive links to help documentation

- New documentation and ongoing updates to documentation in the Support Portal

- Feature Tour to help get users quickly up to speed with the new features

Maintenance Report (Fixes)

Internal Ref.	External Ref.	Details	Area	Status
PDM-11483	-	Limiting maximum sessions was not working as intended	DM Server	Fixed
