DM Release Version 8.3.1

Release date: 29th January 2019

Fixes

The following list contains details of fixes we have implemented since the last release:

- Licence activation no longer incorrectly reports hardware ID as UNKNOWN in some cases.
- Resolved an issue with document updates via webservice v1 (in particular using CUK).
- Resolved a performance degradation in 'NoFile' servlet.
- Infor servlet once again respects both POST and GET requests.
