Lasernet for Dynamics 365

Lasernet BC Connector Release Version 3.0.0.9

Release date: 5th January 2021

New Features and Fixes

The purpose of this section is to outline the new features and fixes of Lasernet 3.0.0.9

- #664   Communicate via file/folders between the connector and Lasernet Server. Only Business Central On-premise supports this.

- #712   More options when exporting / Importing.

- #714   The value of COPYSTR parameter 2 is outside of the permitted range.

- #718   Only Open Entries options are added to the Customer Statement request page.

- #721   Timeout option is added to the Lasernet Setup page.

- #726   Use Connection String instead of URL and user/password on Azure Service Bus settings.

- #728   We have added Tooltips to the Timeout fields in Lasernet Setup.

- #731   Renaming or deleting Document Layout will cause export/import to fail.

- #732   OutputFilePath, OutputFilename and RequiredInterface JobInfos are added to the XML in order to support a file exchange.

- #736   Added extra fields to Sales Order report - Field 24 (DueDate), 60 (Amount Including VAT) and 61 (Amount).

- #738   Sales Blanket Order - There is no Sales Header within the filter.
