Lasernet for Dynamics 365

Lasernet BC Connector Release Version 3.0.2.0

Release date: 12th November 2021

New Features and Enhancements

The purpose of this section is to outline the new features and enhancements of Lasernet BC Connector 3.0.2.0.

#267139 – Export data from Archive

We have improved the Export module and made it possible to export Archive data. Archive data then can be imported to Lasernet Connector for Business Central 4 making an upgrade to the new version smoother.

#258764 – Support Text and Code fields with length more than 250 symbols

Document Layout now supports fields with a length of more than 250 symbols.

#227673 – Interest Rate translation issue in Sales Finance Charge report

Interest Rate translation displayed incorrectly in the Sales Finance Charge report. This has now been fixed.

#227674 – Assembly Line Quantity translation issue in Pick Instruction report

Assembly Line Quantity translation displayed incorrectly in the Pick Instruction report. This has now been fixed.

#227675 – Posting Date translation issue in Warehouse Shipment report

Posting Date translation displayed incorrectly in Warehouse Shipment report. This has now been fixed.

#234250 – Filter issue on Customer Statement report request page

A filter warning message was displayed incorrectly on the Customer Statement report request page. This has now been fixed.

#236626 – Sales Unit of Measure translation issue in Lasernet Item Label report

Sales Unit of Measure translation displayed incorrectly in the Lasernet Item Label report. This has now been fixed.

#241784 – Transfer-to Bin Code issue in Transfer Order report

Bin Code value was wrong in Transfer Order report XML. This has now been fixed.

### #228683 – Distribution Settings import does not pick up Template Code

Distribution Settings import does not pick up Template Code. This has now been fixed.

#234252 – Repeat statement issue during Report Selection Warehouse export

Incorrect repeat statement from Report Selection Warehouse table was used to generate output XML during Export. This has now been fixed.

#259433 – Connection String import issue

Connection String could not be imported if the length exceeded 250 symbols. This has now been fixed.
