

D365 FO Connector Prerelease 6.15

2021-07-27 - Alex Clemons - Comments (0) - D365 FO Connector News

Lasernet for Dynamics 365

Update in relation to LAC365FO and new LAC365FO configuration for Lasernet 10

The next release of LAC365FO is planned for **Thursday 5th of August 2021**, unless we get any critical issue(s).

Currently, we are preparing a new demo setup for LAC365FO and Lasernet 10 and will inform you once this is ready for download in the Formpipe knowledgebase.

We will also inform you if a new version of LAC365FO (6.15.0) is required or if it's enough to apply (merge) new objects into the configuration (existing/demo) when using Lasernet 10.

Enhancements - Lasernet configurations for LAC365FO

Case no.	Description	Ticket no.	Added
223812@LNConfig365FO	Adjustments to the Lasernet configuration - Print of SSRS files	#17638	
224133@LNConfig365FO	Support for loading printers , printer profiles and overlays in Lasernet 10
