Lasernet for Dynamics 365

The Lasernet Connector v. 6.17.1 for Dynamics 365 Finance and Operations is now available for download on our Knowledgebase.

Please remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

[Lasernet for Dynamics 365 FO Installation package Version 6.17.1](#)

Please see our [release notes](#) for more information.

Articles and FAQs can be found [here](#).

This package includes:

- Lasernet default setup with 12 predefined replacement reports
- AX default setup with 12 predefined replacement reports

The Package for LAC365FO exists for Dynamics 365 for Finance & Operations **PU49**, **PU50** and **PU51**. It's not required to install a new package when upgrading Dynamics 365 for Finance & Operations - Similarly to when the LAC365FO package for **PU49** was installed and **upgrading Dynamics 365 for Finance & Operations** to either **PU50** or **PU51** - The original installed package for **PU49** would work after the upgrade.

The recommendation from Microsoft is to use a lsv/LAC-package matching the same build or PU as this could lower the memory usage. However, all three LAC365FO packages contain the same code and will work across versions.

Deployments or Installations of LAC365FO packages are forward compatible and therefore it is not possible to deploy or install a **LAC365FO package for PU51** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
