Lasetnet FO Connector 6.18 Released!

2022-09-23 - Pernille Wichmann - Comments (0) - Lasetnet FO Connector News

Lasetnet for Dynamics 365

The Lasetnet FO Connector 6.18 is now available for download here on our support portal.

Remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

- Click to view [Lasetnet FO Connector 6.18 Release Notes](#)
- Click to download the [Lasetnet FO Connector 6.18 Installation Package](#)
- Click to view the [new features, enhancements, and fixes](#)

The package for Lasetnet Connector exists for Dynamics 365 for Finance & Operations **PU52** and **PU53**.

There is no need to install a new package when upgrading Dynamics 365 for Finance & Operations. The originally installed Lasetnet Connector package for Dynamics 365 for Finance & Operations will work after the upgrade of PU.

The recommendation from Microsoft is to use an ISV/LAC-package matching the same build or PU as this could lower the memory usage. However, all (three) Lasetnet FO Connector packages contain the same code and will work across versions.

Deployments or Installations of Lasetnet FO Connector packages are forward compatible and therefore it is not possible to deploy or install a **Lasetnet Connector package for PU53** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
