

D365 FO Connector v. 6.18 is now available

2022-09-23 - Pernille Wichmann - Comments (0) - D365 FO Connector News

Lasernet for Dynamics 365

The Lasernet Connector v. 6.18 for Dynamics 365 Finance and Operations is now available for download here on our support portal.

Please remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

[Lasernet for Dynamics 365 FO Installation package Version 6.18.](#)

Please see our [release notes](#) for further information.

Articles and FAQs can be found [here](#).

The package for LAC365FO exists for Dynamics 365 for Finance & Operations **PU52** and **PU53**.

There is no need to install a new package when upgrading Dynamics 365 for Finance & Operations. The originally installed LAC package for Dynamics 365 for Finance & Operations will work after the upgrade of PU.

The recommendation from Microsoft is to use an ISV/LAC-package matching the same build or PU as this could lower the memory usage. However, all (three) LAC365FO packages contain the same code and will work across versions.

Deployments or Installations of LAC365FO packages are forward compatible and therefore it is not possible to deploy or install a **LAC365FO package for PU53** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
