

Deprecation of Azure Storage Use in Dynamics 365 Finance and Operations

2024-10-31 - Alice Petruzzella - Comments (0) - Lasetnet FO Connector News

Lasernet for Dynamics 365

Earlier today, we identified an issue regarding the deprecation of Azure Storage use in Dynamics 365 Finance and Operations, which, therefore, also affects Lasetnet FO Connector.

This deprecation has been introduced within a Quality update and blocks the Flight-mode access to Azure Storage. Loss of access to the Azure Storage will result in the errors outlined below when attempting to print reports with Lasetnet.

Microsoft has released a fix for this issue in Quality Update 65 (10.0.41). Therefore, we advise users on 10.0.41 to ensure they are on a working Quality Update.

The following versions **ARE NOT WORKING**: from 10.0.41 (10.0.2015.97 - 102).

The following versions **ARE WORKING**: 10.0.41 (10.0.2015.54 and 0.0.2015.103+ or newer) and 10.0.42. (Last updated January 2024)

Update from Microsoft

Microsoft have acknowledged the issue, and the fix is currently in status 3. The issue number is 4444487.
