

Deprecation of Azure Storage Use in Dynamics 365 Finance and Operations

2024-10-31 - Alice Petruzzella - Comments (0) - Lasetnet FO Connector News

Lasernet for Dynamics 365

Earlier today, we identified an issue regarding the deprecation of Azure Storage use in Dynamics 365 Finance and Operations, which, therefore, also affects Lasetnet FO Connector.

This deprecation has been introduced within a Quality update and blocks the Flight-mode access to Azure Storage. Loss of access to the Azure Storage will result in the errors outlined below when attempting to print reports with Lasetnet.

Microsoft has released a fix for this issue in Quality Update 65 (10.0.41). Therefore, we advise users on 10.0.41 to ensure they are on a working Quality Update.

The following versions **ARE NOT WORKING**: from 10.0.41 (10.0.2015.97 - 102).

The following versions **ARE WORKING**: 10.0.41 (10.0.2015.54 and 0.0.2015.103+ or newer) and 10.0.42. (Last updated January 2024)

Update from Microsoft

Microsoft have acknowledged the issue, and the fix is currently in status 3. The issue number is 4444487.

Link to issue: [Known issues | Power Platform admin center \(microsoft.com\)](#)

The screenshot shows the 'Power Platform admin center' interface. The main content area displays a 'Known issues' page for the issue 'Failures when attempting to generate reports that contain the Lasetnet ISV solution from Formpipe'. The page is divided into three main sections: 'Description', 'Details', and 'Workaround'. The 'Description' section contains a 'Problem' section with the text: 'After updating a Dynamics 365 Finance environment on major version 10.0.41 to quality update 10.0.2015.97 or later, reports generated with the Lasetnet ISV solution can fail with an error message: "System.MissingFieldException: Field not found: "Microsoft.DynamicsOnline.Infrastructure.Components.SharedServiceUnitStorage.StorageContext.StorageConnectionString".'. Below this is a 'Workaround' section with the text: 'Microsoft is generating a hotfix for this error which will be available for uptake by November 3, 2024. Updating to the quality update containing this hotfix is expected to resolve the issue.' The 'Details' section shows the product 'Dynamics 365 Finance', the created on date '11/1/2024', the status 'Active', and the issue ID '4444487'. At the bottom of the details section, there is a 'Was this known issue helpful?' question with 'Yes' and 'No' buttons.

Problem

The following error can occur if flight mode is disabled:

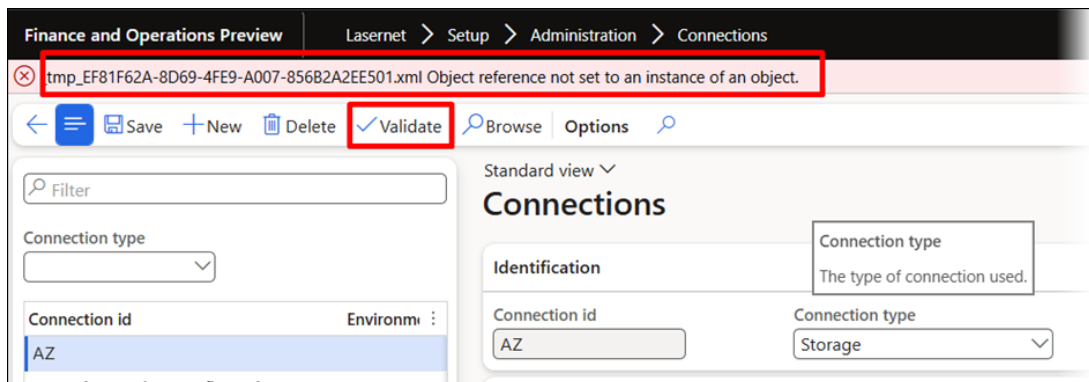

Load from Catalog

Error

EnableSharingOfValidStorageConnectionString is OFF. Fetching a valid storage connection string has been disabled.

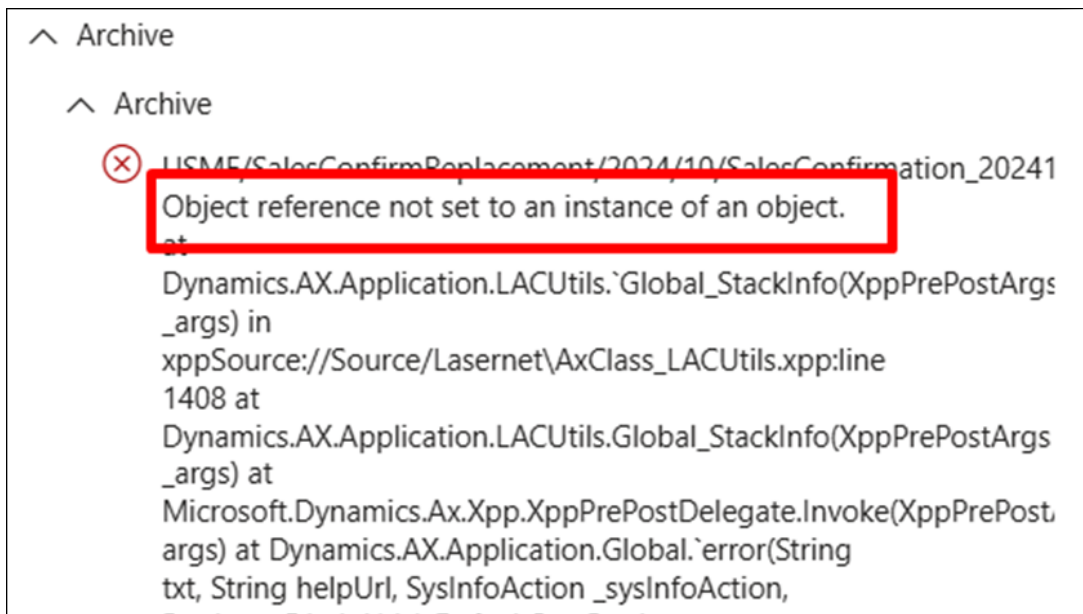

Validate Connection

Error

_tmp_2D46D62A-297A-431F-9340-299C7A7881ED.xml Object reference not set to an instance of an object.

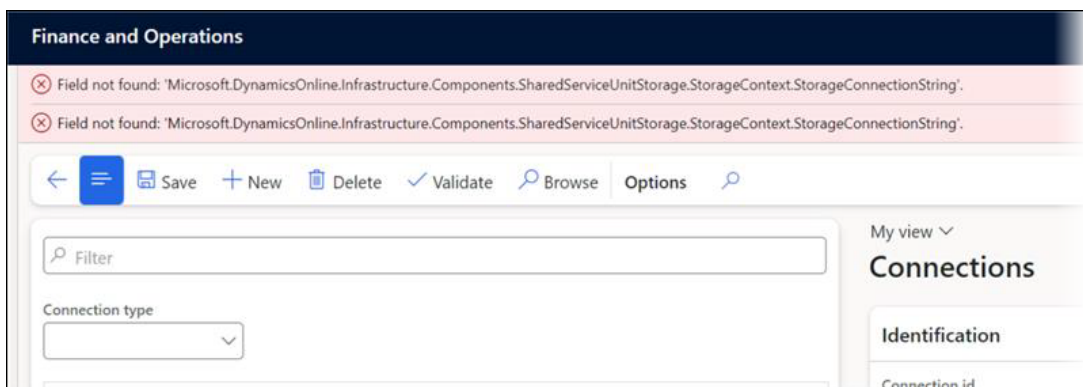

Running a Report

Error

Object reference not set to an instance of an object.

Connections

Error
