End of support for SharePoint 2013 connections within Lاسernet

2022-12-22 - Adam McStravick - Comments (0) - Lاسernet

Microsoft announced that the [end of extended support for SharePoint Server 2013](#) will be 11th April 2023. We have always planned to end support for the SharePoint 2013 integration into Lاسernet on that date.

We recently identified an unexpected issue where the latest Lاسernet version does not work with SharePoint 2013. Due to the imminent end of support date for SharePoint 2013, we have decided to bring forward our own end of support date for the SharePoint 2013 connection.

This means that we will not be implementing a fix to allow the latest Lاسernet version to connect to SharePoint 2013.

Note

Connections to all other versions of SharePoint currently supported by Microsoft still work.
