

Lasernet 10.10.1 Release Notes

2025-01-10 - Sunil Panchal - Comments (0) - Lاسernet 10 Release Notes

Release version: 10.10.1

Release date: 10th January 2025

Notes

[Software installation files](#) are available.

Maintenance Report

This section briefly describes the enhancements in Lاسernet 10.10.1.

Enhancements

Internal Ref.	External Ref.	Area	Details	Status
449098		Azure Storage	Added support for JobInfo substitution in SAS token settings where the JobInfo values originate from an incoming job. This builds on enhancement 446402 added in Lاسernet 10.10 , which added JobInfo substitution in SAS token settings where the JobInfo values are server JobInfos.	Enhancement

Note

Lاسernet 10.10 also added other enhancements related to Lاسernet integration with Azure Storage. For information about these enhancements, read the [Lasernet 10.10 Release Notes](#).

Lasernet 10 System Requirements

For information about Lاسernet 10 system requirements, refer to the [Lasernet System Requirements](#) page.

Important Information to Read Before Upgrading to Lاسernet 10.10

New Installers, Connections, Sign in, and SDK from Lاسernet 10.2

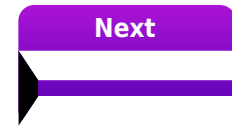

The installation procedure and the configuration procedure in several of the client applications changed at Lاسernet 10.2. There are now separate installers for Lاسernet Server 10 and Lاسernet Developer 10.

If you currently have Lاسernet 10.1.4 or earlier and have not read the release notes for Lاسernet 10.2, it is recommended that you do so before you install Lاسernet 10.10. The information provided there is crucial for upgrading to Lاسernet 10.2 and later, and also

describes changes that affect third-party modules developed with the Lasernet SDK.

How to Get Support

If you encounter difficulty using LaseNet, contact us via the [Create Ticket](#) button in the support portal.
