Details

Status

| | | | | |
|------------------------------|-------|---------------------|--|------------------|
| 336356 | - | Azure Storage Input | Added new JobInfos for downloaded blobs (Filename, FilenameWithoutExtension and Extension) | Feature enhanced |
| 328736 | - | Client app | Adding/changing a value for an Identifier field, assigned to an OCR Engine, will only update the selected job and no longer multiple jobs with same characteristics | Feature enhanced |
| 326793 | - | Client app | Added support for editing Regional Profile for OCR Fields added with date type in item lines | Feature enhanced |
| 316878 | - | Client app | Auto detect regional profile for a manually inserted date value | Feature enhanced |
| 330169 | - | Client app | Preview did not show document if filename extension did not match content | Fixed |
| 333510 | - | Client app | Added support for pressing Enter or F2 to open custom editor for Identifier or Date columns | Feature enhanced |
| 342845 | 30926 | Config Server | Improved date format handling in various browsers | Feature enhanced |
| 342705 | - | Developer | Fixed an incompatibility issue when selecting edit module properties, after import of a migrated configuration, where the destination dialog properties unexpectedly was opened instead of the module properties | Fixed |
| 341684 | - | Developer | Renaming a configuration to the same name as an existing configuration was not possible | Fixed |
| 341028 | - | Developer | Checking for existing config name was case-sensitive, causing an issue where importing a configuration allowed the same name as an existing configuration, but with a different case | Fixed |
| 340813 | - | Developer | The Search tool crashed when clearing content in the "Text to search for" field | Fixed |
| 317897, 324753, 326664 | 25345 | Developer | A race-condition in object locking caused the error message "A lock for this object already exists." | Fixed |
| 335605 | 29989 | Developer | Lasernet Developer unexpectedly used deprecated master settings to create input printers after migrating a configuration from an earlier version | Fixed |
| 325896 | 29307 | Developer | OCR Engine Module: Fixed an unhandled exception when changing default language for Dictionary | Fixed |
| 324069 | - | Developer | Added support to automatically resize columns for Server JobInfos to fit content | Feature enhanced |

| | | | | |
|------------------------|-------|----------------------|--|------------------|
| 324614 | 26695 | Developer | Checkmark colors in tree view for the commit and revert dialogs were wrong for selected items | Fixed |
| 335006 | 28309 | Developer | Improved error handling in property editor. Object names is set to read-only (not editable) to avoid an unforeseen warning that object already exist | Feature enhanced |
| 329001 | - | Developer | Improved Printer Profile error message handling for Printer Service module | Feature enhanced |
| 298396 | - | Dropbox | No longer supported | Deprecated |
| 343858 | 31018 | Formats | Removed irrelevant debug logging for File Input + Output and Form Engine modules about none processed formats | Fixed |
| 338174 | 30325 | Form Editor / Engine | Fixed an issue for Rich Text output, where the DOCVARIABLE code, in some cases appeared in the output document for phrases if a criterion was not true | Fixed |
| 323797 | 28857 | Form Editor / Engine | In rare cases, when a table was added to a region in the bottom of the page, it was longer than expected | Fixed |
| 340375 | 30626 | Form Editor | Fixed a crash on the attempt to select another sheet in Sheet Options dialog | Fixed |
| 335168 | - | Form Editor | Fixed an issue changing type of content from "richtext\docx pdf" to "xhtml" or vice versa | Fixed |
| 326450 | - | Form Editor | Clicking CTRL + left mouse button in 'Form Modifiers' dialog, to copy a modifier, did not work properly | Fixed |
| 335168 | - | Form Editor | Fixed an issue where UI was not updated immediately after changing the sheet output type between Rich Text format and XHTML | Fixed |
| 338492 | 29595 | Form Editor | Improved warning handling, in the Font tab for Edit rearrange dialog, for non-supported font sizes, which could be present after migration of a configuration | Feature enhanced |
| 343456 | - | Form Editor | By clicking on a rearrange or fixed text you will no longer enter inline editing mode by default. Selecting an object and pressing F2 is now required to enter inline editing | Feature enhanced |
| 321775 | - | Form Editor | Added a new context menu to "Keep text formatting" or "Keep text only" when merging two objects by clicking Ctrl + Alt before drag and drop | Feature enhanced |
| 314404, 337075, 337076 | - | Form Editor | Added Auto Scroll support when selecting objects in Edit Rearrange dialog | Feature enhanced |

| | | | | |
|------------------------|--------------|----------------------|---|------------------|
| 331264 | - | Form Editor | Auto focus for output pages has been improved when an input rearrange is selected | Feature enhanced |
| 331265 | - | Form Editor | Added support for PageUp, PageDown, Home and End keys for faster navigation across the output pages | Feature enhanced |
| 322235 | - | Form Editor | Status for Auto alignment and Auto scroll On/Off status added to the status bar | Feature enhanced |
| 316685, 320914, 343456 | - | Form Editor | Made several improvements to the inline editor for Fixed Text and merged Rearranges | Feature enhanced |
| 346912 | - | Form Editor | Added support for a new attribute in XFDF template in Form Editor showing possible values extracted from PDF | Feature enhanced |
| 353797 | 32109 | Form Engine | Fixed logging the "No form match found" message for TXT Forms | Fixed |
| 357631 | 32288 | Form Editor / Engine | There was a rounding error in number decimals when running a form calculation | Fixed |
| 363672 | 32478 | FTP Input | 0 byte files could not be processed by SFTP protocol | Fixed |
| 357721 | 32328 | FTP Output | SFTP protocol crashed when uploading two files after each other, to the same open connection | Fixed |
| 298400 | - | Google Drive | No longer supported | Deprecated |
| 333837 | - | Mail Output | Label names for Request Read Receipt and Request Delivery Receipt are aligned for Mail Output and Outlook Mail modules | Feature enhanced |
| 282476 | 23921, 31349 | Meta app | A DataReader error message could sometimes appear in desktop app, avoiding a user to send a queue document to the server for a short period | Fixed |
| 337576 | - | Meta Output | Meta fields were not always set properly in Meta app, when receiving jobs simultaneously from multiple Meta Output modules | Fixed |
| 336599 | - | Monitor app | Filtering used minutes for months allowing 00-59 to be entered rather than 01-12 | Fixed |
| 335626 | - | Monitor app | The scrollbar was reset unexpectedly on License Page | Fixed |
| 345076 | 30984 | OCR Editor | Aliases were used for language detection instead of term name and using the latest revision instead of the first | Fixed |
| 342295 | - | OCR Editor | Fix for reselection of objects when using property grid causing loss of items in dropdowns | Fixed |

| | | | | |
|----------------|--------------|---------------------|--|------------------|
| 324372 | - | OCR Editor | Added support for reading the CSV file with Identifier values having blank column names | Feature enhanced |
| 318225 | - | OCR Editor | Added support for wildcard matching in OCR Fields | Feature enhanced |
| 353765 | - | OCR Editor | Improved the order of selectable date formats | Feature enhanced |
| 342295 | 30790 | OCR Engine | Fixed an issue where XML output result from OCR Engine included alias name instead of field name as tag names for field names created with splitter functionality | Fixed |
| 346051 | - | OCR Engine | Body lines, with rearranges with height higher than a single line, would auto progress with the height of the tallest rearrange | Fixed |
| 346056, 347492 | - | OCR Engine | Extended logic is added to the greedy function when extracting OCR Fields in the body of a form. Greedy now stops before a line item with an "Exception" or "Must Contain" property is activated | Feature enhanced |
| 341282 | 30710 | Outlook Mail Input | Added support for reading To property, from transport message header, containing the alias mail address | Feature enhanced |
| 353046 | 31989 | Outlook Mail Input | Fixed an issue reading signed emails | Fixed |
| 341528 | 30717 | Outlook Mail Input | Extended the module to accept an invalid email address for InputToName and an empty value for InputToEmail | Feature enhanced |
| 337058 | 27018 | Outlook Mail Input | If images were inserted in an email, they were incorrectly counted as attachments in JobInfo InputAttachmentNumber | Fixed |
| 346907 | 30405 | Outlook Mail Output | Added support for RetryAfter parameter when Microsoft Graph API throttles because of too many requests to server (error code 429) or if service is unavailable (error code 503) | Feature enhanced |
| 323331 | - | PDF Extract | Removed the PDFPageOrientation JobInfo since it could not always be set with a proper value by module | Fixed |
| 336206 | - | PDF Merger | The checkbox of the inactive column was inverted | Fixed |
| 291146 | 24919, 24938 | PDF Merger | Do not attempt to merge empty attachment. The attachment is skipped instead of failing job if attachment is empty (0 bytes) | Feature enhanced |
| 334823 | 29816 | PDF to Text | Added support for PDF documents tagged with version 2.0 | Feature enhanced |

| | | | | |
|--------|-------|-------------------------------------|--|------------------|
| 326048 | 29331 | PDF to Text | Fixed that bounding boxes were not transformed when page was rotated, causing text placement to be incorrect in some cases | Fixed |
| 334823 | 30054 | PDF to Text | Fixed a rendering issue related to the producer wPDF4 by WPCubed | Fixed |
| 338704 | - | Printer Output, Printer Service App | When printing attachments in PDF format, the Lasernet Server will support to automatically choose paper source in the printer by detecting the PDF page sizes in the PDF documents | Feature enhanced |
| 326740 | - | Printer Service app | When app is already started the printer list will automatically refresh when new printers are populated | Feature enhanced |
| 329994 | - | Printer Service app | Added support in UI for saving column order to registry and copying the order to other servers automatically | Feature enhanced |
| 326751 | 26695 | Script Editor | Script was incorrectly saved when clicking the Parse button | Fixed |
| 344378 | 30942 | Server / Job Engine | Fixed a deadlock that could force a job to fail unexpectedly with the following error: | Fixed |
| 328879 | 29510 | SharePoint | Fix for browsing Document Library using Graph API without a valid authentication | Fixed |
| 326751 | 29366 | SharePoint | Improved how the fields in the SharePoint Connection build the URL in UI to establish the connection to SharePoint | Feature enhanced |
| 332009 | 29872 | SharePoint | Support for browsing and selecting accessible subsite IDs when authentication is set to application | Feature enhanced |
| 363417 | 29510 | SharePoint | Some listing sites were excluded when authenticating via app registration | Fixed |
| 324309 | 29020 | SQL Editor | Added a workaround that Microsoft ADO returned parameter sorted by name instead of the order in which they appear | Fixed |
| 324309 | - | SQL Editor | Add + Remove parameter buttons appeared when selecting another stored procedure | Fixed |
| 322684 | - | SQL Editor | Only the last query result was shown in the Text tab when running multiple queries | Fixed |
| 322985 | - | SQL Editor | Added support for DataTable relations between queries in Database Command | Feature enhanced |
| 322678 | - | SQL Editor | Added support for viewing results as a DataSet | Feature enhanced |

| | | | | |
|--------|-------|------------------------|--|------------------|
| 341317 | - | Tesseract OCR | Added GhostScript as recommend default value for force producers/creators and abbyy;omnipage;tesseract as recommend default values for skip producers/creators to optimize processing speed and quality of output | Feature enhanced |
| 316048 | - | Tesseract OCR | Added a new PDF library to process and extract metadata from incoming PDF documents. Note: To ensure backward compatibility, after an upgrade from an older version, this setting is not activated by default. It is highly recommended for new users of the input management solution to activate this setting to be able to process a larger scale of PDF documents from various PDF providers | Feature enhanced |
| 312565 | - | Web Server Input | Added support for octet-stream in REST request (if single parameter) and response | Feature enhanced |
| 328736 | - | Web Client app | Identifier field, assigned to an OCR Engine, is updated for the selected row and not for other rows with documents from the same receiver | Feature enhanced |
| 337070 | - | Web Client | Preview did not show document if filename extension did not matched content | Fixed |
| 318617 | - | Web Client | Added a feature to show and edit a regional profile, assigned to a job by an OCR Engine, in column views for an OCR Field defined as a Date type | Feature enhanced |
| 336610 | - | Web Server Input | An invalid Expire header result was shown (the result is now 0 instead of -1) | Fixed |
| 337708 | 30341 | Web Service | Improved WSDL parser handling | Feature enhanced |
| 343466 | 30994 | XML Transformer Editor | The Find (CTRL+F) functionality was disabled | Fixed |
