Maintenance Report

This page describes the enhancements and fixes in Lاسernet 10.8.

Internal Ref.	External Ref.	Area	Details	Status
408994		Config Server	Fixed an issue that made it possible to remove the system Administrator group.	Fixed
405355		Developer	Fixed an issue where the Help > Reset Help menu item did not restore previously dismissed help text overlays to the application.	Fixed

405613	Developer	Fixed an issue where Duplicate was available in the right-click menu for the Master server (in the main area of the window when Servers was selected in the Tools area).	Fixed
405681 408121	Developer	Fixed some UI glitches in the Printers and JobInfo tabs of server Properties windows.	Fixed
408753	Developer	Fixed an issue where moving a from destination for a Pass-Through module was not possible via drag'n'drop when in diagram mode.	Fixed
409844	Developer	Fixed a UI issue that caused some profile properties in the Security Profiles area to be displayed in the wrong column.	Fixed
402438	Engines	Fixed an issue where the following engines did not create a new JobID (cloned job) after combining only a single job: Compression Engine, JobToXML, RichTextConverter, PDF Engine, TIFF Engine, and PDF Merger.	Fixed
407867	Form Editor	Fixed an issue where the Subform Editor, when in JSON mode, could not be closed after a parse error occurred in a template.	Fixed
404604	Form Engine	Fixed an issue that caused the Form Engine to use an extensive amount of memory when processing batch jobs in text input mode.	Fixed

409746		Input modules	Fixed a critical service crash that occurred on Leap Day (29th February during a Leap Year) if in Scheduler the Type of Event setting for input modules was Every year .	Fixed
409241		OCR Editor and Engine	Fixed an issue where some supported language names in the UI were not presented in English for the bundled Dictionary database.	Fixed
381739		OneDrive Input	Fixed an issue where the setting of the Case-sensitive regular expression option was not saved when the option was selected (set to true).	Fixed
381668		Mail Output	Fixed an issue where the setting of the Request Delivery Receipt and Request Read Receipt options was not always synchronized between the Lasernet Developer Properties pane and the Setup tab of the Mail Output Properties window.	Fixed
413726		XML Transformer Editor	Fixed a crash in the XML Transformer Editor if an XPath (used in an action) ended with a / (forward slash).	Fixed
408762	36463	XML Transformer Editor	Added support for using JobInfo substitution in XPaths used in actions (like Lasernet 9).	Fixed

Lasernet 10 System Requirements

For information about Lasernet 10 system requirements, refer to the [Lasernet System Requirements](#) page.

Important Information to Read Before Upgrading to Lasernet 10.8

New Installers, Connections, Sign in, and SDK from Lasernet 10.2

The installation procedure and the configuration procedure, in several of the client applications, changed at Lascript 10.2. There are now separate installers for Lascript Server 10 and Lascript Developer 10.

If you have not read the [release notes for Lascript 10.2](#), we recommend that you do so before you install Lascript 10.8, so that you can learn how to upgrade to Lascript 10.2 and newer, and learn about changes in third-party modules that have been developed with the Lascript SDK.

Software Changes Made to Enable Formpipe to Release Lascript While Microsoft Defender is Wrongly Detecting Malware in Lascript Monitor

Since December 2023, Microsoft® Defender has been flagging the LnMonitor.exe software as Trojan:Win32/Znyonm!pz or Phonzy malware. However, this is a "false positive", and Microsoft has confirmed that this is the case.

For more information, see

<https://support.formpipe.com/news/posts/lascript-monitor-exe-file-detected-as-malware-by-microsoft-defender>.

The issue is due to the software that generates the Insights charts on the **Performance** and **Transactions** tabs of Lascript Monitor. To be able to deliver security patches and fixes for our users of Lascript 10, Formpipe Software has decided to exclude the **Performance** and **Transactions** tabs, and also the functionality embedded in those tabs, from Lascript 10.7 onwards to prevent Lascript Monitor from being flagged as malware.

You do not have to take any further actions to avoid this issue after you upgrade Lascript Monitor to version 10.8.

How to Get Support

If you encounter difficulty while using Lascript, please contact us via the [Create Ticket](#) button in the support portal.
