Lasernet Release Version 8.12
Release date: 4th April 2019

New Features and Fixes

The purpose of this section is to outline the new features and fixes of the components of Lasernet Version 8.12.

Lasernet Form Editor

- We have optimized the speed for loading lists/thumbnails for overlay files in the 'Add overlay' dialog.
- Improved the rearrange dialogs to refuse invalid criteria expressions.
- It is now allowed to enter multiple regional profiles with the same name.
- Numbers were converted incorrectly in specific cases when using "Ceiling".
- Fixed an issue with a combination of merged rearranges with criteria that did not always trim whitespaces.
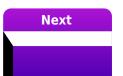

Lasernet OCR Editor

- Fix for an issue with CSV File content missing for Identifiers.

Lasernet Client

- The "Save as" functionality in the preview window now uses the value of the Filename, if the JobInfo exists, as the suggested filename.
