Lاسernet Release Version 8.14

Release date: 5th July 2019

New Features and Fixes

The purpose of this section is to outline the new features and fixes of the components of Lاسernet Version 8.14.

Lاسernet Form Editor

- Fixed the detection of landscape mode in preview mode for EMF output.
- Fixed an issue where a deleted overlay, from the Import Printed Overlays dialog, were still being imported.
- Disabled logger info about image rendering.
- Fixed an issue where a double space was present in the email body for some readers, when the XHTML template was pasted/loaded from another application.

PDF to Text

- Fixed a case where text strings were converted into two words.

Web Server

- Fix for the wrong response content-type when a request is SOAP 1.1.

XML Validator

- Fixed a crash when attempting to download schema when there's no internet connection
