# Lasetnet

### **Lasetnet Release Version 8.15**

**Release date:** 14th October 2019

### **New Features and Fixes**

The purpose of this section is to outline the new features and fixes of the components of Lasetnet Version 8.15

#### **Lasetnet Developer**

- Fixed a crash on the display of Recent configs, caused by Windows update 2019-08 Cumulative Update for Windows Server 2016 for x64-based Systems (KB4512495).

#### **Lasetnet Form Editor**

- Added support for enhanced numbers of Form Criteria.
- Fixed missing CRLF after the last line when splitting pages in the Form Engine.
- The Modifier criteria page has been reworked & improved to support an unlimited number of criteria.
- The navigation to a specific page number, in EMF/PDF output sheets, has been improved if a sheet contains many pages.
- Fixed an issue when the auto-scroll functionality didn't work properly from Pattern And Rearranges dialog.
- The ScriptEditor collapsing in Edit Form Modifier dialog is fixed.

#### **Lasetnet Client**

- Fixed an issue where the Search function did not return a result for a Paused and Scheduled job.

#### **Lasetnet OCR**

- Fixed an issue where an OCR Form in certain situations did not keep grab data.

### **Exchange**

- Fixed an issue where public folders did not return the UnreadCount property.

### **File Input**

- Fixed a locking issue when picking up .Injob as input files.

### **PDF Engine**

- Fixed an issue where Hebrew text was reversed (requires Windows EMF as overlay format).

### **XML Transformer**

- Fixed a crash when running XML actions after a modifier returned invalid XML caused by an invalid codepage.
- Added log message when running modifier returns invalid XML.

### **Regional Profiles**

- Processing Long Date in Regional Profile would be working in the wrong way in some cases.
