Lasernet Release Version 8.16

Release date: 15th May 2020

Not released but included in version 8.17 Lasernet Form Editor.

New Features and Fixes

The purpose of this section is to outline the new features and fixes of the components of Lasernet Version 8.16.

Lasernet Form Editor

- Fixed an issue where text could be missing in overlays after migration from an older version.
- Added support for absolute paths as a part of the file name when inserting images from SharePoint.
- The expression evaluator evaluation for form criteria returned a wrong result for specific cases.
- The inactivated pattern did not allow further pattern matching for the next pattern.

Lasernet XML Transformer Editor

- The XPath for an XML Transformer form criterion was not handled as expected for XML attributes. This is now fixed.
