New Features and Fixes

The purpose of this section is to outline the new features and fixes of the components of Lasernet Version 9.13.2.

Internal Ref.	External Ref.	Area	Details	Status
270603	-	Outlook Mail	The multi-request Graph API, introduced in Lasernet 10 to support attachments up to 150 Mb, has been temporarily removed because larger attachments did not send.	Temporarily fixed
			The single-request Graph API has been reinstated while we work on resolving quirks with the multi-request method (ID's and sent items). This will support the sending of files up to 4 mb by removing larger attachments. Now, only attachments in the Outlook Mail output module, also supported by Microsoft in their single request Graph API, will send.	
			Note: We are working to restore the multi-request Graph API.	
270699	-	Outlook Mail	The error message "Unable to create files" was incorrectly shown when renewing tokens (retainers) in multi-thread mode.	Fixed
