# Lasernet 9.2

2019-02-08 - Nicole Ojeda - Comments (0) - Lasernet 9 Release Notes

**Lasernet Release Version 9.2** 

Release date: 8th Feb 2019

#### **New Features and Fixes**

The purpose of this section is to outline the new features and fixes of the components of Lasernet Version 9.2.

#### **Lasernet Module Tester**

The Lasernet Module Tester is a new application designed to verify/debug a configured module from the Lasernet Developer before committing and deploying any modules.

For more details, please see the New Features page.

# **Lasernet Developer**

- It is now prohibited to rename a Form Engine if engine contains forms.
- Fixed an issue where right-clicking a menu adding modules mistakenly only showed the input modules.
- Fixed a crash when creating thumbnails during the import of Rich Text forms.
- Contents of the JobInfo dialog couldn't be edited if the JobInfo value contained a fixed
- An unexpected error was shown when adding a SubForm was canceled.
- Improved the usage of script modifiers added to modules.

# **Lasernet Form Editor**

- There is now support for inline modifiers in forms.
- Improved the usage of the binding tool on the Properties button for Rich Text Editor.
- Background and border support added to SubForm objects.
- Fixed an error when closing Form Editor after adding an image to a Spreadsheet via

- an URL on the clipboard.
- Fixed a crash when adding a rearrange in XML output mode with the property editor open.

#### **Lasernet Client**

- Multi-selection of destinations is now prevented.
- Fixed an issue releasing a scheduled job which caused LnService to crash.

#### **Lasernet OCR Editor**

• CSV file assigned to an identifier field is now reloaded when the dialog is opened.

# **Lasernet Script Editor**

- Added a new function to allow aborting a script function call after a specified amount
  of time.
- Implemented a different timeout mechanism for trying to gain an exclusive lock in ScriptFile::open.

# File Output + FTP Output

 Added mutexes to prevent the same filenames when the "File exist -> Rename" property is activated.

#### **XML Validator**

• Fixed an issue where DTD unexpectedly was prohibited for OIOUBL.

#### Lasernet API

 Fixed an issue where the method for computer list was not compatible with AX Connector.

#### .NET Module SDK

• The module now receives JobModuleConfiguration.
